NETWORK COMMUNICATION SOLUTIONS

Overview

Standards from Cat5e to Cat7a

IPOINT offers a wide range of networking cables from Cat5e to Cat7a and includes domestic and industrial LAN cables and their patch cables.

IPOINT has developed Cat6a, Cat7 and Cat7a cables for the 10 G solution and these products are in mass production. Our Cat6a and Cat7a cables are approved for Delta EC Cabling certification.

Abbreviations

- CCS Copper Clad Steel
- SBC Solid Bare Copper
- BC Bare Copper
- TC Tinned Copper
- CCA Copper Clad Aluminum
- SPC Silver Plated Copper
- SWA Steel Wire Armor
- SWB Steel Wire Mesh
- STA Steel Tape Armor
- PE Polyethylene
- HDPE High density PE

- SPE Solid PE
- FPE Foam PE
- PTFE Polytetraethylene
- FEP Fluorinated Ethylene Propylene
- PVC Polyvinyl Chloride
- FR-PVC Fire Resistant PVC
- LSF Low Smoke and Smoke
- LSZH Low Smoke Zero Halogen
- XL-LSZH Cross Linked LSZH
- PUR Polyurethane

Important Definitions

Alien Crosstalk

Unwanted signal coupling from one component, channel, or permanent connection to another is defined as alien crosstalk. Because alien crosstalk is an indication of differential (or balanced) signal coupling, alien crosstalk cannot be negatively affected by common-mode noise (for example) from motors or fluorescent lights present in the environment. Alien crosstalk only To approximate the energy when couples are energized

It is specified as a power sum parameter in the standards. The sum of the power measured at the near end depends on the alien crosstalk loss (PSANEXT The sum of the power loss) and the power measured at the far end is called the alien crosstalk attenuation ratio (PSAACRF). High power sum alien crosstalk levels can compromise the operation of a 10G BASE-T application.

Attenuation to Crosstalk Ratio, Far-End (ACRF) (Previously known as ELFEXT)

Pair to pair far-end crosstalk (FEXT) loss quantifies unwanted signal coupling between adjacent pairs at the end point opposite the transmit end (far end) of cables or a component. ACRF is calculated by subtracting the measured insertion loss from the measured far-end crosstalk loss and is used to compare cable and cable performance regardless of length.

Provides a normalized value that can be used for Weak ACRF levels can result in increased error rates and/or undeliverable signaling packets. NEXT loss margin alone is not sufficient to ensure correct ACRF performance.

Attenuation to Crosstalk Ratio (ACR)

A critical consideration when determining the capability of a cable system is the difference between insertion loss and near-end crosstalk (NEXT) loss. This difference is known as Attenuation to crosstalk ratio (ACR). Positive ACR calculations mean that the transmitted signal power is stronger than the near-end crosstalk power. ACR defines a signal bandwidth where signal-to-noise ratios are sufficient to support certain applications (e.g. category

6 to 200 MHz) can be used to define An interesting note is that digital signal processing (DSP) technology can perform crosstalk cancellation, which allows some applications to extend the available bandwidth to the point where the calculated ACR equals zero. Nevertheless, the maximum frequency at which positive ACR is achieved provides a benchmark for evaluating the usable bandwidth of double-stranded cable systems.

Balance

Reverse pair transmission relies on signal symmetry or "balance" between the two conductors of a pair. Maintaining the correct balance ensures that cable systems and components do not emit unwanted electromagnetic radiation and are not susceptible to electrical noise. Component stability requirements are specified for category 6/classE cables. Component and cable balance requirements,

Specified for cables of category 6 /class EA and higher classes. Equilibrium can be characterized by longitudinal conversion loss (LCL), longitudinal conversion transfer loss (LCTL), transverse conversion loss (TCL) or equal level transverse converse transfer loss (ELTCTL).

Equal Level Far-End Crosstalk (ELFEXT)

See definition of Attenuation to Crosstalk Ratio, Far-End.

NETWORK COMMUNICATION SOLUTIONS

Insertion Loss (Attenuation)

Insertion loss is a metric that measures the reduction in signal strength along the transmission line. It is important to ensure minimal signal attenuation because digital signal processing (DSP) technology cannot compensate for excessive signal loss.

Near-End Crosstalk (NEXT) Loss

Pair-to-pair near-end crosstalk (NEXT) loss quantifies unwanted signal coupling between adjacent pairs in cabling or at the near ends of a component (same end as the transmitting end). Excessive NEXT loss can be detrimental to applications that do not use crosstalk cancellation digital signal processing (DSP) technology.

Total power

Pair-to-pair crosstalk parameters can be expressed as a power sum that approximates the level of unwanted internal signal coupling present when all pairs are energized. Characterization of power sum NEXT loss, ACRF, ANEXT loss and AACRF to minimize crosstalk from multiple interferences in cabling confirms that it is significantly robust.

Such characterization is necessary to ensure compatibility with applications that use four pairs to transmit and receive signals simultaneously, such as 1000 BASE-T, and foreign crosstalk-sensitive applications such as 10G BASE-T.

Propagation Delay and Delay Variation

Propagation delay is the time between transmitting a signal and receiving it at the opposite end of the cable channel. This effect is similar to the time delay between lightning striking and hearing noise, but electrical signals travel much faster than sound.

The delay gap is the difference in arrival times between the couple with the least delay and the couple with the most delay. Transmission errors associated with excessive delay and delay difference include increased jitter and bit error rates.

Insertion Loss

Return loss is a measure of signal reflections that occur along a transmission line and is related to the impedance mismatches present along the cabling channel. New applications such as 1000 BASE-T and 10 G BASE-T, full duplex transmission

coding schemes (transmitting and receiving signals are on the same conductor) Because it is based on a superimposed pair, it is susceptible to errors that may result from limited return loss performance.

- Mounting temperature: -30°C to +50°C

Application

- Volp , ISDN
- Token , 100M TP-PDM
- Analog and Data Video
- TR-16 Active And Passive
- 155M/662m/1.2GATM
- IEEE802.3: 100Base; 100Base-T 1000Base-T 10GBase-T

Standards and Performances

- ANSI/TIA 568 C.2 - 10
- TIA 568 C Draft
- RoHS Compliant Directive 2002/95/EC
- UL 444

Content of the Data Sheet

Category	F/UTP CAT6-4P-LSZH			
Test Standard	ISO/IEC 11801, TIA- 568-C.2, YD/T 1019			
Conductor	Material	Solid-Bare Copper		
	Nom.O.D.(mm)	0.570	up +0.005 down -0.005	
Insulation	Material	HDPE		
	Diameter	1.09±0.03 mm		
Screening Material	Aluminum Foil			
Sheath	Thickness	0.60±0.05mm		
	External O.D.	7.4±0.4 mm		
	Surface	Clean,Frap,Satiation		
	Material	LSZH / PVC		
Surface Printing	Color	According to the requires		
	Letter height	3.0±0.3mm		
	Print error & Space	< ± 0.5%, 1m		
Core Color	1 White- Blue /Blue	2 White-Orange /Orange		
	3 White-Green /Green	4 White- Brown /Brown		
Packing	Wooden Tray & Carton			
Wooden Tray dimension	According to the requires			
Packing Length	305±1.5m / 500±			
Rip-Cord	Yes	Drain Wire	Yes	
Sheath Physical Properties	Before Aging Tensile Strength (Mpa) ≥10.0 Elongation (%) ≥125			
Electrical Characteristics (20 °C)	Aging Period (°C×hrs) 100°C × 24h × 7d			
	After Aging Tensile Strength(Mpa) ≥8.0 Elongation(%) ≥100			
	Cold bend(-20±2°C×4h) 8×Cable O.D.			
	1.0-250.0MHz Impedance ((Ω) 100±15			
	1.0-250.0MHz Delay Shew (ns/100m) ≤45			
NVP 69%				
Capacitance(nF/100m) max: 5.6				
Unbalanced-to-ground capacitance (pf/100m) max 330				
DC Resistance (Ω/100m) max 9.38				
DC Conductor Resistance Unbalance (%)max 5.0				

Product Code

FO-LC6a-UUTPP
FO-LC6a-UUTPH

Product Description

U/UTP CAT6a PVC Cable
U/UTP CAT6a LSZH Cable

NETWORK COMMUNICATION SOLUTIONS

Lan Cables | U/FTP Cat6a

NETWORK COMMUNICATION SOLUTIONS

Features and Benefits

- Exceeds CAT6a standard specifications
- Can be used for CAT6a patch cables
- Available in different colors on request.

Transmission Features

- Temperature range (C°): -30 to 50
- Speed ratio (%): 76
- Characteristic impedance: (from 1 to 250 MHz) 100±15 Ohm, (from 250 to 500 MHz) 100±18 Ohm, (from 250 to 500 MHz) 100±25 Ohm Bending radius (min.): 8 x cable outer diameter
- Flame retardancy: IEC60332-1
- UL file number: E334179 ETL
- Compliance Number: 101768951CRT-001c

Product Structure	
Conductor (dia.mm)	23 AWG SBC 0.57
Insulation (dia.mm)	Skin-Foam-Skin PE
Individual Protection	Foil
Drain Wire	0.45 mm TC
Jacket (dia.mm)	PVC / LSZH 7.4 ± 0.5
Couple Number	4

- ### Product Description
- Nominal temperature: 90 °C
 - Reference Standard: UL444, UL1581
 - pure solid copper conductor
 - Rohs/REACH compliant PVC / LSZH Jacket
 - Flame Test: IEC60332-1 ,IEC60332-3C CMX
 - Installation temperature: -30°C + 50°C

- ### APPLICATION
- Volp, ISDN
 - Token, 100M TP-PDM
 - Analog and Data Video
 - TR-16 Active And Passive
 - 155M/662m/1.2GATM
 - IEEE802.3: 100Base;100Base-T 1000Base-T 10GBase-T

Standards and Performances

- IEC 61156-6
- EIA/TIA 568-C.2-1 CAT6
- ISO 11801 Edition 2 - CLASS D
- EN 50173 Edition 2 - CLASS D

Network Applications

- ISDN - VoIP
- TOKEN RING 4/16 Mbits - 100 VGAnyLAN
- TP-PMD/TP-DDI - ATM 155, 622, 1200 Mbits

PATCH PANELS

NETWORK COMMUNICATION SOLUTIONS

CAT3 Patch Panel Series | CAT3 ISDN 25 Port Telephone Connection Patch Panel

The Cat3/ISDN telephone patch panel is a high-density telecommunications panel with 25 standard RJ-45 jacks. Printed circuit board and high quality components ensure Cat3 performance. All ports are numbered. It offers a simple and economical way to connect a telephone system or telephone infrastructure. The panel is available in 1U height.

Features

- Conforms to ANSI/TIA-568-C.2 Category 3, ISO/IEC11801 and EN501731 specifications.
- T568 supports A&B connection diagrams and provides easy installation.
- The IDC connector can accept 23-26 AWG solid and coiled wires.
- Supports industry standard tools such as 110 or Krone punch down tools.
- There is a cable management hole to easily manage cables with cable ties.
- RoHS Compliant

Electrical and Physical Properties

- IDC Connection: 0.8mm thick Phosphor Bronze, tin plated over nickel
- Jack Lifetime: minimum 750 insertion-disconnection operations High impact resistant plastic housing, UL 94V-0
- Jack Connection: Phosphor Bronze, 50µinch thick gold plated over nickel
- IDC Lifespan: minimum 200 installation-disconnection operations
- PCB: FR-4, 1.6mm thickness
- Dielectric Strength: 1000V RMS for 1 minute
- Insulation Resistance: Minimum 10MΩ
- Connection Resistance: 2mΩ per connection
- Temperature Range: -20°C to +80°C
- Humidity: 10% - 65%

APPLICATION

- 10BASE-TX Ethernet
- Audio, Video and other applications

Product Code

FO-SP-3005-25PC3L

Product Description

1U 25 Port UTP Cat3 ISDN Patchpanel

NETWORK COMMUNICATION SOLUTIONS

CAT3 ISDN 50 Port Telephone Connection Patch Panel | CAT3 Patch Panel Series

Cat3/ISDN telephone patch panel is a high-density telecommunications panel with 50 standard RJ-45 jacks. Printed circuit board and high quality components ensure Cat.3 performance. All ports are numbered. It offers a simple and economical way to connect a telephone system or telephone infrastructure. The panel is available in 1U height.

Features

- Conforms to ANSI/TIA-568-C.2 Category 3, ISO/IEC11801 and EN50173-1 specifications.
- T568 supports A&B connection diagrams and provides easy installation.
- The IDC connector can accept 23-26 AWG solid and coiled wires.
- Industry standard tools (110 or Krone punch down tools).
- Cable management hole to easily manage cables with cable ties.
- RoHS Compliant.

Electrical and Physical Properties

- IDC Connection: 0.8mm thick Phosphor Bronze, tin plated over nickel
- Jack Lifetime: minimum 750 insertion-disconnection operations High impact resistant plastic housing, UL 94V-0
- Jack Connection: Phosphor Bronze, 50µinch thick gold plated IDC on nickel
- Lifespan: minimum 200 assembly-disassembly operations
- PCB: FR-4, 1.6mm thickness
- Dielectric Strength: 1000V RMS for 1 minute
- Insulation Resistance: Minimum 10MΩ
- Connection Resistance: 2mΩ per connection
- Temperature Range: -10°C to 60°C Humidity: 10% - 65%

APPLICATION

- 10BASE-TX Ethernet
- Audio, Video and other applications

Product Code

FO-SP-3005-50PC3L

Product Description

1U 50 Port UTP Cat3 ISDN Patchpanel

NETWORK COMMUNICATION SOLUTIONS

CAT5 Patch Panel Series | CAT5e 24 Port UTP Fast Ethernet Connection Patch Panel

Features

- Hinged style window with white label
- Every 8-Port based module is interchangeable

Electrical and Physical Properties

- UL 1863 safety listed.
- UL 94V-0 flame retardant plastic.
- Complies with ANSI/TIA-568-C.2 standards.
- Dimensions: 482.6mm (Width) x 43.65mm (Height) x 35.0mm (Depth).

APPLICATION

- The protruding part of the IDC terminals holds the wires in place before termination.
- Double IDC with 110 or Krone vehicle.
- ANSI/TIA-568-C.2
- Compatible with CAT5e component performance.

Product Code

FO-SP-3000-PCB-24PC5E

Product Description

1U 24 Port UTP Cat5e Patchpanel (110 Krone IDC - Horizontal)

NETWORK COMMUNICATION SOLUTIONS

CAT5e 48 Port UTP Fast Ethernet Connection Patch Panel | CAT5 Patch Panel Series

Features

- Hinged style window with white label
- Every 6-Port based module is replaceable

Electrical and Physical Properties

- UL 1863 safety listed.
- UL 94V-0 flame retardant plastic.
- Complies with ANSI/TIA-568-C.2 standards.
- Dimensions: 482.6mm(W) x 87.40mm(H) x 35.0mm(D)

APPLICATION

- The protruding portion of the IDC terminal holds the wires in place before termination.
- Double IDC with 110 or Krone vehicle.
- ANSI/TIA-568-C.2
- Compatible with CAT 5e UTP component performance.

Product Code

FO-SP-3000-PCB-48PC5E

Product Description

2U 48 Port UTP Cat5e Patchpanel (110 Krone IDC - Horizontal)

NETWORK COMMUNICATION SOLUTIONS

CAT5 Patch Panel Series | CAT5e 24 Port Utp Fast Ethernet Patch Panel (Straight Connection Type)

Features

- PLUG to PLUG RJ45 CONNECTORS
- UTP MATCHING SLOT
- THE BACK OF THE BODY IS A HALF-MOON-SHAPED METAL CASE
- SQUARE CABLE ORGANIZERS
- COLOR CODE: BLACK RAL 9005 POSITIONED ON THE LEFT AND RIGHT SIDE OF THE PATCH PANEL

Technical Specifications

- 1U HEIGHT= 44.45mm
- 19 INCH WIDTH = 483 mm
- 8*3=24 = NUMBER OF PORTS UTP (unshielded pair cable)
- Compatible with RJ45 Connector CATEGORY 5 and 6
- METAL CASE BODY STAINLESS METAL BODY PORT NUMBERS

Product Code

FO-PP-1U-CAT5-24

Product Description

1U 24 Port UTP Cat5e Patchpanel (In-line UTP Coupler Type)

NETWORK COMMUNICATION SOLUTIONS

CAT5e 24 Port UTP Fast Ethernet Patch Panel (Straight Connection Type) | CAT5 Patch Panel Series

Features

- RJ45 PORTS UTP
- MATCHING SLOT IS THE ROUND BACK OF THE METAL CASE BODY, HALF-MOON-SHAPED AND SQUARE-SHAPED CABLE ORGANIZERS ARE AVAILABLE.
- COLOR CODE BLACK RAL 9005 ON LEFT AND RIGHT SIDE OF PATCH PANEL

Technical Specifications

- 2U HEIGHT= 88.90 mm
- 19 INCH WIDTH = 483 mm
- 8*6=48 NUMBER OF PORTS UTP (unshielded pair cable)
- RJ45 Connector
- CATEGORY 5 METAL CASE BODY STAINLESS METAL BODY PORT NUMBERS

Product Code

FO-PP-2U-CAT5-48

Product Description

2U 48 Port UTP Cat5e Patchpanel (110 Krone IDC - Horizontal)

NETWORK COMMUNICATION SOLUTIONS

CAT6 Patch Panel Series | CAT6 Gigabit Ethernet Patch Panels

IPORT Category 6 Series Patch Panels are available in loaded and unloaded versions with 6-8-12-24 and 48 ports. With professional structure design, our Category 6 UTP patch panels are extremely durable to punch down powerfully. With its 110 and dual type IDC design, it accepts 110 Krone type punch down tools and fits 23-26 AWG solid and coiled UTP cables. There are writable and erasable marking surfaces on the front panel for each port for efficient system management.

Applications

- 10BASE-TX Ethernet
- 100BASE-TX Fast Ethernet
- 1000BASE-TX Fast Ethernet
- 250MHz and above
- Audio, video and other applications

Electrical Properties

- Dielectric Strength: 1000 for 1 minute
- V RMS Insulation Resistance: 10MΩ min
- Contact Resistance: 20 mΩ maximum
- Storage Temperature: -40 °C to +70 °C maximum
- Operating Temperature: -20 °C to +60 °C maximum
- Humidity: 10% - 65%
- Unbalance Input/Output Resistance: 200 m Ohm maximum
- Insulation Resistance: 500 Mega Ohm min. @500 Vdc DC Resistance: 0.1 Ohm maximum @20 °C
- EMC Standards: EN-55022 Class B, FCC Part 15 Subpart J Class A

Certificate and Test Numbers

- UL CODE: Patch panels shall be UL Listed under file number E357669
- 3P CODE: P/N IPOINT Attestation of Conformity No.113796
- ETL Conformity No: 101069064CRT-001e

NETWORK COMMUNICATION SOLUTIONS

Cat6 24 Port UTP Fast Ethernet Patch Panel (IDC Type) | CAT6 Patch Panel Series

Features

- Hinged style window with white label
- Every 8 Port based module can be replaced

Standards And Physical Properties

- 250MHz and above
- ISO/IEC-11801
- UL 1863 safety listing
- UL 94V-0 fire retardant plastic
- ANSI/TIA/EIA-568-C.2
- 482.6mm(W) x 43.65mm(H) x 35.0mm(D)

Applications

- The protruding portion of the IDC terminal holds wires in place before termination
- Dual IDC with 110 or Krone tool
- Compliant with ANSI/TIA-568-C.2 CAT 6 component performance

Product Code

FO-SP-3000-PCB-24PC6

Product Description

1U 24 Port UTP Cat6 Patchpanel (110 Krone IDC - Horizontal)

NETWORK COMMUNICATION SOLUTIONS

CAT6 Patch Panel Series | CAT6 24 Port Utp Ring Patch Panels (D-Ring / IDC Type)

Features

- Hinged label holder for easy label replacement
- Every 8-Port based module is interchangeable
- Compatible with both 110 and Krone finishing tools

Standards And Physical Properties

- UL 1863 safety listing
- UL 94V-0 fire resistant plastic
- ANSI/TIA-568-C.2
- Dimensions: 482.6mm(W) x 43.65mm(H) x 34.8mm(D)

Application

- For CAT 6 UTP solutions
- Features D-ring design to organize cables horizontally to reduce installation space
- Compliant with ANSI/TIA-568-C.2 CAT 6 component performance

Product Code

FO-SP-3000-PCB-24PC6M

Product Description

1U 24 Port UTP Cat6 Patchpanel (D-Ring 110 Krone IDC - Horizontal)

NETWORK COMMUNICATION SOLUTIONS

Cat6 24 Port S/FTP Fast Ethernet Patch Panel (IDC Type) | CAT6 Patch Panel Series

I|PORT 6 S/FTP tray panel meets standards that exceed transmission performance. It supports bandwidth up to 250MHz and beyond and passes the ANSI/TIA-568C.2 Category 6 performance standard.

Features

- Tray type patch panel
- UL 1863 Safety Listed
- Printed labels for port identification
- Ground wire installed

Product Code

FO-SP-4000-T24PC6

Product Description

1U 24 Port S/FTP Cat6 Patchpanel (110 Krone IDC Closed)

NETWORK COMMUNICATION SOLUTIONS

CAT5 Patch Panel Series | CAT5e 24 Port Utp Fast Ethernet Patch Panel (Straight Connection Type)

Features

- PLUG RJ 45 CONNECTORS
- UTP JOINING KEYSTONES
- ROUNDED BACK SIDE OF THE METAL CHASSIS HALF-MOON-SHAPED, SQUARE-SHAPED CABLE ORGANIZERS.
- COLOR CODE BLACK RAL 9005
- ON THE LEFT AND RIGHT SIDE OF THE PATCH PANEL

Technical Specifications

- 1U HEIGHT= 44.45mm
- 19 INCH WIDTH = 483 mm
- 8*3=24 = NUMBER OF PORTS
- UTP (unshielded twisted pair) RJ45 Connector

Complies with the Category 6 / Class E standard at the component level in accordance with ANSI/TIA/EIA-568-C.2-1, ISO/IEC 11801 2nd edition and CENELEC EN50173.

- » Simple and labor-saving termination using standard 110 Block termination and Krone tools.
- » Supports solid or stranded 22-26 AWG wires.
- » Adjustable protective strain relief.
- » Simple assembly and installation for reliable performance.
- » Compatible with various international faceplates and patch panels in accordance with IEC 60603-7 (603-7). » Plastic Rating UL-94V0.

Features

- RJ45 8P 8C 50µ inch Gold Plated Jack
- Installing 1U 24 Port High Density
- Provides the total solution of your local area network
- Dual IDC connector can accept 23-26 AWG solid and stranded cables

- Support T568 A&B wiring and easy installation
- RoHS compliant
- Performance conforms to ANSI / TIA / EIA-568-C.2, ISO/IEC 11801 and EN50173-1 Category 6 specification

UTP / FTP / STP is available for 1Gb / 10Gb systems, Jacks comply with ANSI/TIA/EIA-568-C.2-1, ISO/IEC 11801 2nd edition and CENELEC EN50173 Category 6 and high ATM 622 Mbps, Fast applications such as Gigabit Ethernet 1000 Mbps and the high-speed applications of the future. IPORT's modular jacks are designed to work with 110 and Krone termination tools. The Keystone jack is available in 90 and 180 degree termination design with wiring diagram and conductor protection cover. The jacks are compatible with a wide range of standard international front panels and patch panels. The jacks support both solid and braided cables. A unique, adjustable protective strain relief cap is used, supporting versatile horizontal cable termination. Jacks comply with IEC 60603-7 standards.

Technical Specifications

- Suitable for 22-24 AWG cable
- IDC termination interface
- Durability: 1500 times wearing
- Terminating 250 times

Materials

- Jack Housing: Polycarbonate UL 94V-0
- Jack Contacts: Phosphor bronze, 50 micro inch gold plated over nickel
- Wiring Block Housing: Polycarbonate UL 94V-0
- IDC Contacts: Lead-tin plated phosphor bronze
- Flammability: Conforms to UL 94V-0
- Standards: Jack openings comply with IEC 60603-7 and FCC 68.500

Category 6 UTP 90°/180° keystone jacks are PC plastic package, suitable 250MHz bandwidth for different application environments, international standard ISO/IEC 11801 / EN-55022-EN50173 and ANSI/TIA -T568-C.2 requirements. 8 Pin insert has good flexibility It has and durability. Conforms to RoHS standards

Electrical Properties

- Dielectric Strength: 1000V RMS for 1 minute
- Insulation Resistance: 10 MΩ min
- Contact Resistance: 2 mΩ per contact
- Temperature Range: -20°C to 60°C maximum
- Humidity: 10%-65%
- Contact Resistance: 20m Ohm max
- Unbalance Input: 200m Ohm max
- Input/Output Resistance
- Dielectric Strength: 1 Minute for 1000 Volts
- rms
- Insulation Resistance: 500MegaOhm min.@
- 500VDC
- DC Resistance: 0.1 Ohm max. @20C

Applications

- 10BASE-TX Ethernet
- 100BASE -TX Fast Ethernet
- 1000BASE -TX Fast Ethernet
- Audio, video and other applications

Certificate and Test Numbers

- UL CODE: Keystone Jack will be UL
- Listed under file number E357669
- 3P CODE: P/N IPORT Approval
- Compliance No.113786 &113796
- ETL Compliance Number:
- 101769064CRT-001a

Dimensions and Physical Properties

- High impact resistant plastic housing, Flame retardant UL 94V-0
- (ABS+PC,UL 94V-0)
- IDC Contact: 100 µ inch nickel plated on phosphor bronze
- IDC Operating Life: Minimum 250 Re-Terminations
- Jack Contact: Phosphor bronze, 50µ inch gold plated over nickel plated at contact area
- Jack Working Life: Minimum 750 placements
- PCB: FR-4, 1.6mm thickness
- RJ Standard socket conforming to FCC part 68, endurance 750
- loops can be used on any keystone wall plate or patch panel without Load;
- Cat6, T568A and T568B cabling options are available. Meet every wiring requirement.
- Plastic Housing: PC UL94V-0
- Contact Material: Phosphor Bronze Selective Gold Plated on Nolide Wire, durability 200 cycles;
- Including 100 micron nickel information on copper and 50u gold plating.
- Supports T568A and T568B
- Supports ANSI/EIA/TIA, 568B2-1 standards
- Storage degree. : -40+85°C
- Operating temperature. : -20+60°C
- EMC tested and passed; EN-5502, Class B (Europe); FCC Part 15, Subpart J, Class A (US) Certified
- Tin-plated IDC contact material phosphor bronze:
- IDC Enclosure:
- 1.Double IDC: 110 and LSA
- 2. PC UL94V-0
- IDC Cover: ABS

- » Compatible with various international face sheets and patch panels in accordance with IEC 60603-7 (603-7).
- » Plastic Rating UL-94V0
- » IEC 60603-7-2 (for UTP)
- » IEC 60332-1 (for UTP and FTP)
- » IEC 60603-7-3 (for FTP)

S T A N D A R D S

- » Used between patch panels and consolidation points in network cabinets.
- » Used to connect consolidation points to network cabling.
- » Fully supports LAN applications.
- » Horizontal communication cable; Used for indoor installations.

Technical Specifications (For FTP)

- Outer Diameter: 5.5 mm(nom)
- Durability: 1000 Cycles
- Impedance: 100 ohms
- Contact Resistance: 20m Ohm max.
- Imbalance Resistance: 2% Max
- Dielectric Strength: 1000 Volt/1 minute min.
- Insulation Resistance: 500 MOhm min.@500 Vdc
- Storage Temperature: -40°C.....+80°C
- Operating Temperature: -20°C.....+80°C
- Hold: 50 N (11 IBF) for 60 ± 5 s
- Mating cycle life: Min. 1000 cycles
- Tensile strength: ≥ 10 N per wire
- Outer Sheath: PVC / LSZH
- Type: Shielded RJ45 8P8C modular plug.
- Housing: UL listed 94V-0 flame retardant polycarbonate
- IDC blades: Phosphor bronze, gold plated over 100 µ inch nickel in the contact area.
- Minimum band radius: 4 outer cable diameters.
- Builder: 4 pairs, 7 strings, 24/26 AWG, FTP
- Conductor: Stranded bare copper
- Ground Wire: Solid tinned copper

- » Compatible with Class E/Category 6 standards.
- » Used with molded RJ45 connector.
- » Electrically compatible above 250 MHz.
- » Connector connection material; It is plated with 1.27µm (50 µ-inc) gold over 2.54µm (100 µ-inc) nickel.
- » There are 6 standard color options (Grey, White, Blue, Red, Yellow, Green, Orange).
- » There are 9 standard length options (0.5m, 1m, 2m, 3m, 5m, 7m, 10m, 15m, 20m), other lengths can be provided on request.
- » Carefully designed and tested to keep near-end confusion (NEXT) within acceptable limits.
- » Colored covers are available for department color coding.
- » Built with top quality components.
- » RoHS compliant 2002/95/EC
- » High quality 23/24AWG solid and compressed copper wire is used.
- » Number of conductors 4 pairs UTP
- » Number of isolated conductors There are 8 pairs, each of them is braided.
- » Cable covering type PVC (Polyvinyl Chloride)
- » Connector A&B RJ-45 Male, RJ-45 Male
- » Both RJ-45 connectors comply with IEC 60603-7-41 standards.

Applications

- Designed for use with Megabit&Gigabit networks
- Patches from hub to distribution panel
- Connects workstation to wall outlet
- 10 Base-T,100 Base-TX,1000Base-TX
- Token Ring 4-16 Mbit, 155-622 Mbit ATM
- ISDN etc

Technical Specifications (For UTP)

- Outer diameter : 5.7mm(nom)
- Durability : 750 Cycles
- Internal resistance : 100ohm
- Contact resistance : 20m Ohm max.
- Imbalance Resistance : 2% Maximum
- Dielectric strength : 1000 Volt/1 minute min.
- Insulation Resistance : 500MOhm min.@500 Vdc
- Storage temperature : -40°C.....+80°C
- Operating temperature: -20°C.....+60°C
- Outer jacket : PVC/LSZH
- Eclipse : 50 N (11 IBF) for 60 ± 5 s
- Mating cycle : Min. 1000 cycles
- Tensile strength : ≥ 20 N per wire
- Medicine : Unshielded RJ45 8P8C modular plug
- Housing : UL listed 94V-0 flame retardant polycarbonate
- IDC blades : Phosphor bronze, gold plated over 100 µ nickel in the contact area.

Certificate and Test Numbers

- UL CODE: Keystone Jack will be UL Listed with file number E357704.

NETWORK COMMUNICATION SOLUTIONS

Cat6 Series | SFTP Cat6 Patch Cables

NETWORK COMMUNICATION SOLUTIONS

SFTP Cat6a Patch Cables | Cat6a Series

This product is designed for use with Megabit and Gigabit networks. It is used to provide connections from the hub to the distribution panel. It also connects workstations to a wall outlet.

This product supports various networking standards such as 10 Base-T, 100 Base-TX Fast Ethernet and 1000Base-T (IEEE802.3). Additionally, it supports Token Ring at 4-16 Mbit and ATM at 155-622 Mbit.

Besides network connections, this product also supports other applications such as ISDN, Voice and T1. It also supports Power over Ethernet (POE), which allows power transmission over an Ethernet cable.

Finally, this product has a bandwidth of 250 Mhz, which is suitable for broadband video applications.

Designed for gigabit networks

Provides connections from the distribution panel to the hub
Connects workstations to wall outlets

10 Base-T, 100 Base-TX Fast Ethernet, 1000Base-T (IEEE802.3), 100 Base T4

Token Ring 4-16 Mbit, 100VG-Any LAN 155, 622, 1200 Mbit ATM

ISDN, Voice, T1, Voip Power over Ethernet (POE)

500Mhz Broadband Video

Technical Specifications

- Outer diameter : 6.5mm(nom) ± 0.5
- Durability : 1000 Cycles
- Internal resistance : 100ohm
- Contact resistance : 20m Ohm max.
- Imbalance Resistance : 2% Maximum
- Dielectric strength : 1000 Volt/1 minute min.
- Insulation Resistance : 500MOhm min.@500 Vdc
- Storage temperature : -40°C.....+80°C
- Operating temperature : -20°C.....+60°C
- Outer jacket : PVC/LSZH
- Eclipse : 50 N (11 IBF) for 60 ± 5 s
- mating cycle : Min. 1000 cycles
- Tensile strength : ≥ 20 N per wire
- Medicine : Unshielded RJ45 8P8C modular plug
- Housing : UL listed 94V-0 flame retardant polycarbonate
- IDC blades : Phosphor bronze, gold plated over 100 µ nickel in the contact area
- Conductor : Stranded bare copper
- A.W.G. : 24/26AWG
- Drainage Wire : Solid tinned copper
- Transmission Performance : 1-750MHz specifications

AUDIO AND VIDEO DISPLAY PORT

AUDIO AND VIDEO HDMI™

Why DisplayPort? **Get Ready for the Next Generation and What Comes After with DisplayPort**

DisplayPort offers high-performance digital connectivity for almost any use at home or work. This is the standard of the future. How DisplayPort performs compared to other technologies. Would you like to see it show?

HDMI Technology

Thanks to HDMI technology, it is possible to transfer digital data without compression. For this reason, while the data transfer rate is increased, the image and sound quality are also preserved.

House

Work

Game

You finally have space to work without all those extra cables, cords, and bulky monitors.

Office

DisplayPort makes ultra-thin monitors and displays a reality thanks to its exclusive direct drive feature, allowing monitors to take up less desk space while delivering the visual performance you need. Forget about fighting with your monitor to twist the thumbscrews on large, invisible connectors. Monitor setup is now very easy with DisplayPort. Just plug and play with the new ultra-small DisplayPort connector and ultra-thin DisplayPort cables that deliver high-resolution digital display, digital audio, and two-way communication. With DisplayPort-enabled products, your home office has never looked cleaner and more organized.

Video Editing

DisplayPort delivers up to 10.8 Gbps of bandwidth over standard cables, delivering billions of colors, enabling the fastest refresh rates and highest color depths. Because DisplayPort allows your monitor to deliver the deepest color depths at the highest resolutions and update rates, editing and creating content at high resolution and beyond becomes possible. DisplayPort is designed to easily handle advanced 3-D and Blu-Ray signals. With DisplayPort, you get the high performance you need to edit in HD and see what you're working on as it was truly meant to be seen.

Digital Photography

Only DisplayPort offers both high resolution and high color depth, making it ideal for the digital darkroom. Now your monitor can be enabled to closely match your printer or even a professional off-site printer, allowing professional creative image control from standard products.

We need the high resolution and accurate color reproduction that we can only get from DisplayPort.

IT

DisplayPort can operate up to 15 meters (49.21 feet) without the need for signal boosters. Making DisplayPort the perfect choice for conference room projectors, digital displays and remote PC applications. Simple adapters allow you to connect displays that use older connection standards such as DVI, HDMI and VGA. Therefore, switching to high performance with DisplayPort will not strain your budget. Remember the problems you faced when a projector never worked properly with your laptop? Never worry again. DisplayPort provides a true plug-and-play digital projector experience with your laptop. Projectors are laptop friendly again.

Medical Imaging

Medical imaging is one area where DisplayPort is unrivaled when it comes to image resolution and accuracy. With lower EMI (Electromagnetic Interference) and RFI (Radio Frequency Interference) rates than other digital display interface technologies, DisplayPort is ideal for sensitive environments. And it delivers each pixel directly to the screen without compression, ensuring the highest fidelity and most accurate image reproduction. With native fiber optic support, DisplayPort can be operated from 100s of meters to remote monitors or other imaging equipment. Cables can extend up to 15 meters (49.21 feet) without requiring significant signal degradation or signal boosters.

It's as if we were in the game, it's so realistic.

Game

DisplayPort is the best choice for high-performance PC gaming. Designed to support 3D stereo streaming, DisplayPort is the ideal gaming interface for today and the future. DisplayPort natively supports high resolutions and refresh rates for the best gaming monitors in the industry. Get in the game with DisplayPort when fast response and high performance are important to your gaming experience.

Home Cinema

Setting up your home theater system with DisplayPort is as easy as plug and play. With native fiber optic cable support, DisplayPort can be used from room to room to provide high-performance display, audio, and bi-directional control over ultra-thin fiber optic cables; wall-operated boxes at both ends. DisplayPort is Blu-ray Disc ready with built-in HDCP support. With its unique direct drive capability, DisplayPort simplifies the design of ultra-sleek HDTVs, enabling ultra-thin, high-resolution display panels with discrete electronics that can be hidden from view.

Technology

HDMI is fully backwards compatible with PCs, displays, and consumer electronics devices that include the Digital Visual Interface (DVI) standard. Both HDMI and DVI were pioneered by Silicon Image and are based on TMDS®, Silicon Image's powerful, high-speed serial link technology. HDMI supports standard, enhanced or high-definition video as well as multi-channel digital audio over a single cable. It transmits all ATSC HDTV standards and supports 8-channel digital audio, and with 5 Gbps bandwidth, HDMI can accommodate future enhancements and requirements. Because HDMI is designed specifically for consumer electronics applications, it offers a number of additional consumer enhancements. Because digital content can present itself in a variety of sizes, resolutions and formats, HDMI-enabled systems will automatically configure to display content in the most effective format. Additionally, HDMI enables single remote point and click, allowing manufacturers to offer home theater systems that are automatically configured with a single command from the remote; View DVDs, listen to CDs, or watch cable or satellite TV.

HDMI Ethernet Channel

HDMI Ethernet Channel technology combines video, audio and data streams into a single HDMI cable, combining the unparalleled signal quality and convenience of an HDMI connection with the power and flexibility of a home entertainment network. Provides high-speed, bi-directional network connectivity up to 100 Mbps by adding a dedicated data channel to the HDMI connection

Standard HDMI Cable

Standard HDMI cable is designed to support most home applications and has been tested to reliably transmit 1080i or 720p video (HD resolutions typically associated with cable and satellite television, digital broadcast HD, and upscaling DVD players).

Standard HDMI Cable with Ethernet

This type of cable offers the same basic performance (720p or 1080i video resolution) as the Standard HDMI Cable shown above, plus an additional, dedicated data channel for the device network, known as the HDMI Ethernet Channel. The HDMI Ethernet Channel function is only available if both connected devices are HDMI Ethernet Channel enabled.

Automotive HDMI Cable

Designed for internal wiring of vehicles equipped with on-board HD video systems. Tested to a more robust performance standard and capable of withstanding the unique stresses of the driving environment, such as vibration and extreme temperatures.

High Speed HDMI Cable

The High Speed HDMI cable is designed and tested to handle video resolutions of 1080p and above, including advanced imaging technologies such as 4K, 3D and Deep Color. This is the recommended cable if you're using any of these technologies or connecting your 1080p display to a 1080p content source, such as a Blu-ray Disc player.

High Speed HDMI Cable with Ethernet

This type of cable offers the same basic performance (1080p video resolution and beyond) as the High Speed HDMI Cable shown above, plus an additional, dedicated data channel for the device network, known as the HDMI Ethernet Channel. The HDMI Ethernet Channel function is only available if both connected devices are HDMI Ethernet Channel enabled.

HDMI™ Connector To HDMI™ Connector | High Speed HDMI Cable with Ethernet

Overview

- HDMI cable, HDMI type A plug-HDMI type A plug
- Cable: Triple shielded oxygen-free copper cable
- Conductor: 99.99% oxygen-free copper
- Outer sheath: PVC
- Connector: 24K gold plated
- Insulator: Aluminum foil shielding and foam polyethylene dielectric insulator
- Supports 3D Technology: Defines input/output
- Protocols for major 3D video formats.
- 1920x1080 Full HD support

HDMI V1.4 Active Optical Cable

Features | Scope of Application

- Maximum Length up to 100 m. (Custom Length Available)
- Providing computer storage up to 1080P and 4K
- Low Power Consumption: 250mW (Max.)
- Compatible with HDMI version 1.4
- Plug and play
- HDCP Support
- Hybrid optical cable with fiber and copper wire
- No External Power Required

- In digital signal
- LED signs on streets and stadiums
- In Medical Imaging Equipment
- In In-Flight Video System
- in home theaters
- On TV Broadcasting Stations
- In Conference Room Video Equipment
- In the security system

Optical Performance	
Type	Description
Units	Source Sink
HDCP&DDC	HDCP 1.4 Fully Support bi-directional EDID and HDCP communication
Standard	Compliant with HDMI 1.4 version
Video Bandwidth	3.4Gbps*3Channel (max)+ Clock(340MHz)
Supported Resolution & Distance	PC: WUXGA 1920 x 1200 up to 100 meters, HDTV: 480p, 720p, 1080i and 1080p deep color, 4k, 3DFull HD 1920 x 1080 up to 100 meters
O/E Converter	4 channel 850 nm VCSEL array 4 CH GaAs PD array
Connector Type	HDMI Type A Female
Cable Type	Hybrid type with OM2 fiber and copper wire
Cable Length	15m~330m (with 0~+30cm tolerance) Custom length available
Cable Outer Diameter	4.2mm
Jacket Outer Material	PVC/TPU(Custom)
Differential Input	100 ohm (typ.)
Power Consumption	250mW (Max.)
Power Supply	Non external power required
Operating Temperature	0°C to 50°C (32°F to 122°F)

HDMI™ Connector To HDMI™ Connector High Speed HDMI™ 2.0

SCOPE OF APPLICATION

- HDTVs, Monitors, Game Consoles, DVD Players, DVRs, Projectors, etc. Connects high-definition A/V devices such as

Features

- 2x HDMI® Male Connector
- Nickel-plated HDMI connector
- High quality construction
- Supports resolutions up to 4k x 2k

SCOPE OF APPLICATION

- Blu-Ray Disc™ players, HDTVs, DVD Players, DVRs, game consoles, projectors, etc. Connecting high-definition A/V devices such as

Features

- 2x HDMI® Male Connector
- Gold-plated HDMI connector
- High quality construction
- Supports resolutions up to 4k x 2k

Overview

- IPOINT High Speed HDMI digital video and audio cables are manufactured and engineered from high-quality materials and are expertly engineered to deliver high-quality, high-definition performance. The HDMI standard combines high bandwidth video and multi-channel digital audio in a single cable, providing crystal clear image resolution.
- FO-HDMI-XXM High Speed HDMI® cable (2m/3m/5m/7m/10m/20m/25m/40m) features 2 nickel-plated HDMI (male) connectors and durable high-quality construction for Blu-Ray Disc™ players, Provides a reliable HDMI-HDMI connection between devices such as HDTVs, DVD players, stereo receivers, projectors and more.
- This high-quality HDMI cable fully supports 1080p+ resolution up to 120Hz refresh rate and comes with true colors. To meet the demands of future high-definition devices, such as increasing resolutions and higher frame rates, our HDMI cables can support 340 MHz (10.2 Gbps) bandwidth and 1440p resolution.
- The HDMI cable is backed by IPOINT's Lifetime Warranty.

Advantages

- Nickel-plated connections prevent corrosion to ensure a high-quality HDMI® connection.
- Shaped HDMI connectors provide a durable connection with strain reliefs, ensuring long-lasting, error-free HDMI-HDMI audio and video performance without damaging the connectors

Overview

- The IPOINT High Speed HDMI cable comes with ethernet capability.
- Provides connection between HDMI Connector and HDMI Connector.
- Conductor: 99.99% oxygen-free copper
- Cable: Double shielded oxygen-free copper cable
- Outer Case: PVC
- Connector: 24K Gold Plated Connector
- Insulator: Aluminum foil shield and foam PE insulator
- HDMI Ethernet Channel (HEC): HDMI Ethernet Channel provides the ability to share an internet connection via HDMI cable to HDMI Ethernet Channel output and HDMI devices capable of internet connection, it does not require a separate ethernet connection.
- Audio Return Channel (ARC): Audio Return Channel provides the opportunity to transmit audio data of televisions with Audio Return Channel output upwards to the AV Receiver via HDMI Cable, no extra cable is required.
- 3D: 3D describes the input/output protocols that allow 3D displays and source devices to communicate over an HDMI connection.
- 4K Support: 4K Support defines a resolution of 4000 lines wide and 2000 lines high.

Advantages

- Nickel-plated connections prevent corrosion to ensure a high-quality HDMI® connection.
- Shaped HDMI connectors provide a durable connection with strain reliefs, ensuring long-lasting, error-free HDMI-HDMI audio and video performance without damaging the connectors

 - Supports resolutions up to 4k x 2k

Technical Specifications

Cable Length: 2 m / 3m / 5m / 7m / 10m /15m /20m / 25m / 30m / 40m
 Color: Black
 Connector Type: Straight
 Product Length: 2m / 3m / 5m / 7m / 10m /15m/20m/25m/ 30m/40m
 Product Weight: 0.1 kg
 Data Rate: 10.2 Gbps
 Bandwidth: 340 MHz
 Resolution: 4k
 Color Depth: 36/48 Bit
 Color Support: 16.7 Million
 Audio sampling frequency: 192Khz

Warranty Information

Warranty: Lifetime

Hardware

Cable Sheath Type: PVC - (Polyvinyl Chloride) /LSZH (Low Smoke Zero Halogen)
 Cable Armor Type: Braided Aluminum-Mylar Foil
 Connector Plating: Nickel

Connector(s)

Connector A : HDMI (Male)
 Connector A : HDMI (Male)

Advantages

- Nickel-plated connections prevent corrosion to ensure a high-quality HDMI® connection.
- Shaped HDMI connectors provide a durable connection with strain reliefs, ensuring long-term, error-free HDMI to HDMI audio and video performance without damaging the connectors.
- Thanks to its durable screw connection, it is resistant to vibration and breaks.
- Provides the most stable transmission.

Product Code	Product Description
FO-HDMI-S-XX	HDMI With Screw Connection

AUDIO AND VIDEO

Micro HDMI to HDMI

Features

- HDMI to Micro HDMI cables support 3D Technology, Audio Return Channel, 4K Ultra HD Resolution and Ethernet Channel High Quality Cable.

Technical Specifications

Cable Length: 2 m / 3m / 5m / 7m / 10m /15m /20m / 25m / 30m / 40m

Color: Black

Connector Type: Straight

Product Length: 2m / 3m / 5m / 7m / 10m /15m/20m/25m/ 30m/40m

Product Weight: 0.1 kg

Warranty: Lifetime

Hardware

Cable Jacket Type : PVC - (Polyvinyl Chloride) / LSZH (Low Smoke Zero Halogen)
 Cable Shield Type : Braided Aluminum-Mylar Foil
 Connector Plating : Nickel

Connector(s)

Connector A : Micro HDMI (D-TYPE)
 Connector B : HDMI (Male)

Advantages

1. High Speed Micro HDMI cables connect a tablet, digital camera or camcorder to an Ultra HD TV (UHD TV), projector or monitor with HDMI input.
2. Compatible with Micro HDMI devices only
3. It simultaneously delivers high-definition video and lossless multi-channel digital audio.
4. 24K Gold-plated connectors resist corrosion, ensure durability and improve signal transmission.

Overview

Overview

- Connector: Optionally available in many color options with gold/nickel/copper plating.
- Supports plug-and-play connections for devices such as external hard drives, modems.
- Printers, scanners, VoIP devices and other USB peripherals.
- Supports USB 480Mbps speed for fully rated USB 2.0.
- Supports plug-and-play connections for devices such as external hard drives, modems, printers, scanners.
- VoIP devices and other USB peripherals.

- Connector: Optionally available in many color options with gold/nickel/copper plating.
- Supports plug-and-play connections for devices such as external hard drives, modems.
- Printers, scanners, VoIP devices and other USB peripherals.
- Supports USB 4.8 Gbps speed for fully evaluated USB 3.0.
- Supports plug-and-play connections for devices such as external hard drives, modems, printers, scanners.
- VoIP devices and other USB peripherals.

- Connector: Optionally available in many color options with gold/nickel/copper plating.
- Supports plug-and-play connections for devices such as external hard drives, modems.
- Printers, scanners, VoIP devices and other USB peripherals.
- Supports USB 480Mbps speed for fully rated USB 2.0.
- Supports plug-and-play connections for devices such as external hard drives, modems, printers, scanners.
- VoIP devices and other USB peripherals.

- Connector: Optionally available in many color options with gold/nickel/copper plating.
- Supports plug-and-play connections for devices such as external hard drives, modems.

USB NETWORK CABLES

High And Full Speed USB 3.0 Network Cables (TypeB)

Overview

- USB 3.0 SuperSpeed cables provide transfer speeds of up to 5 Gbit/s with high quality and enhanced shielding. USB 3.0 connectors are partially compatible with USB 2.0 device plugs for their respective physical form factors. The cables can be used with PCs that have a true type A interface. The new USB 3.0 Type B connectors are not downward compatible.
- Color: Black

USB / USB - v2.0 | ADAPTER

Materiel

- Housing: White ABS High Impact UL94V-0 Thermoplastic.
- Shell: Copper Alloy, Tin-Lead Plating on Copper.
- Plastic: PBT High Impact UL94V-0 Thermoplastic, Glass Filled 130°C.
- Contact: Copper Alloy 3U" Gold Plated RoHS Compliant.

Physical Properties

- Durability: EIA 364-09,1500 Cycles.
- Temperature: -55°C~+85°C.
- Humidity: 10%-90% relative humidity.

Electrical Properties

- Voltage: 30 VAC
- Current: 1.5 AM MIN PER CONTACT AT 30°C T-INCREASE
- Insulation Resistance: 10 Mohm MINIMUM
- Permanent Voltage Dielectric: 300 V AC.
- Contact Resistance: 2 ohm MAX START.

2 PORT HDMI&USB 2.0 Frame

HDMI™ Extender

Overview

- Extends HDMI up to 100 meters for 1080p over a CAT5.
- It follows the IEEE-568B standard.
- Supports up to 1080p Full HD resolution.
- Supports Ethernet bandwidth: 100M.
- HDCP compatible.
- Extends via router connection or LAN connection, cable length requirements are as follows.
- Maximum 80 meters for CAT5 between two devices.
- Maximum 100 meters for CAT5e between two devices.
- Maximum 120 meters for CAT6 between two devices.

FIBER OPTIC HDMI

I P O R T
NETWORK SYSTEMS

FIBER OPTIC CABLES

FIBER OPTIC CABLES

Patch Cables | Simplex and Zipcord Patch Cables

Scope of Application

- Temporary connections between patch panels and transmission equipment
- Local Network Systems and FDDI applications
- F/O connectors for factory assembly

Features

- Halogen-free and flame retardant sheath with good mechanical properties, fully fire resistant
- Produces low smoke and corrosive gases during combustion
- Totally dry design
- Easy installation and use
- Easy peelability and excellent peel force stability
- High flexibility and lightness
- 2mm or 2.9mm diameter alternatives
- Subunits with additional strengthening elements are desired.

Cable Specifications

	Simplex		Zipcord	
Outer Diameter	2 mm	2.9 mm	2x4 mm	2,9x5,8 mm
Cable Unit Weight(kg/km)	4,3	9,1	8,6	18,2
Cable Supplied Lengths	1 km			

Mechanical And Environmental Properties

	Simplex		Zipcord	
Temperature Range for transportation and storage during installation in service	-25 C - +70 C -5 C - +50 C -20 C - +60 C			
Minimum Bending Radius (mm) during installation in service	35	50	35	50
Maximum Allowed Tensile Strength (N)	150	200	300	400

FIBER OPTIC CABLES

Duplex Patch Cables | Patch Cables

Scope of Application

- Temporary connections between patch panels and transmission equipment
- Local Network Systems and FDDI applications
- F/O connectors for factory assembly

Features

- Halogen-free and flame retardant sheath with good mechanical properties, fully fire resistant
- Produces low smoke and corrosive gases during combustion
- Totally dry design
- Easy installation and use
- Easy peelability and excellent peel force stability
- High flexibility and lightness
- 7 mm or 8.4 mm diameter alternatives
- Subunits with additional strengthening elements are desired.

Cable Specifications

	Duplex	Duplex
Outer Diameter	7 mm	8.4mm
Cable Unit Weight (kg/km)	45	75
Cable Supplied Lengths (km)	1	1

Mechanical And Environmental Properties

	Duplex	Duplex
Temperature Range Conversion and for Storage During Installation Service	-40C~+85C	20C~+85C
Minimum Bending Radius During installation service		
Maximum Allowed Tensile Strength (N)	400-600	300-450

FIBER OPTIC CABLES

Standard Color Coding for Optical Cable Tubes and Fibers

Multi Loose Tube & Flex Tube Fiber Optic Cables

Buffer Tube Colors (For maximum 24 loose tubes per cable)

TUBE NO	1	2	3	4	5	6	7	8	9	10	11	12
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Longitudinal Strip Pipes

TUBE NO	13	14	15	16	17	18	19	20	21	22	23	24
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Fiber Colors (For Max. 24 Fibers Per Tube)

TUBE NO	1	2	3	4	5	6	7	8	9	10	11	12
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Ring Marked Fibers at 50/60 mm Intervals

TUBE NO	13	14	15	16	17	18	19	20	21	22	23	24
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Centrak / Monotube Fiber Optic Cables

Fiber Colors (For Max. 24 Fibers Per Tube)

TUBE NO	1	2	3	4	5	6	7	8	9	10	11	12
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Ring Marked Fibers at 50/60 mm Intervals

TUBE NO	13	14	15	16	17	18	19	20	21	22	23	24
Color	Blue	Orange	Green	Brown	Grey	White	Red	Black	Yellow	Violet	Pink	Aqua

Notes:

- Faux fillings for Multi Loose and Flex tubes are natural or black unless stated.
- Specially designed color codings are available on request according to DIN/VDE or IEC standards.
- Black ring marking is done for all fibers, but black fibers can be replaced using yellow ring marking or natural fibers.
- Optionally, using color-coded threads for fiber groups can be used instead of ring-marked fibers.
- Compliance with TIA / EIA 598 and EN 50174-1 standards can be achieved by using natural fibers instead of white fibers.

FIBER OPTIC CONNECTORS

FIBER OPTIC CONNECTORS

FIBER OPTIC CONNECTORS

Connectors

The most important component of the connector is the ferrule and is strictly selected according to the application. Single mode ferrules are characterized by precision hole (diameter) workmanship combined with high production precision and centering. They are supplied pre-polished, that is, they are given a significant radius, which is reflected in the parameters of the products.

Multimode ferrules are also supplied pre-polished and have a hole diameter set for multimode cables. An adapter is a mechanical device used to align and join two or more fibers with different connection types.

Features

- High efficiency, repeatable, low loss optical connections and low reflection
- Good mechanical durability and stress relief
- Can be repaired in the field
- It should be strong physical structure, easy to use but small enough to pass through channels.
- Easy to clean
- Compatible with standard fibers and patch cords
- Can be repaired in the field
- Cost effective
- Low insertion loss and back reflection loss
- UL-rated plastic body and protective cover
- Free moving ceramic ferrule
- High precision alignment
- Protective covers in different colors

Scope of Application

- Patchcord and Pigtail Production
- Termination of cables at the construction site
- Telecommunication
- LAN Networks
- Automation
- Tracing

FIBER OPTIC CONNECTORS

Quick Connector

Quick Connector

IPOINT Fit Plus SC ve LC konektörleri, sahada 2 dakikadan daha kısa bir sürede kurulabilir. XP Fit Plus ise epoksi yerine indeks eşleştirme jeli ve iç mekanik tutucu kullanır; bu sayede fiberi nazıkçe ve sağlam bir şekilde tutar. Kurulum hızlı ve kolaydır; standart bir kılıf soyucu ile fiberi soyun, bir fiber temizleyici ile kesin ve hazır XP Fit Plus konektörlere kaydırın. Cilalama veya yapıştırıcı gerektirmeyen bu yerinde kurulumlar kolayca gerçekleştirilebilir ve zaman kazandırır.

Features

- High Temperature Stability
- Good Interchangeability
- Good Durability
- Low Insertion Loss
- High Back Reflection Loss
- Standard: compliant with DIN 47256

Suitability

- Simplex / Duplex Patchcord Available
- SC/PC and SC/APC Patchcord Available
- Various Boot (cable) Sizes Available

Scope of Application

- Cable TV (CATV)
- Telecommunication Networks
- Active Device Link
- Local Area Networks (LANs)
- Video
- Data Processing Networks
- Wide Area Networks (WANs)
- Built-in Installations
- Industrial and Medical Applications

Optical Performance	
Applicable for	3.1 x 2.0 mm Drop cable
Optical fiber diameter	125µm, 2.00 mm or 3.00mm indoor cable (G657A or G652D)
Tight buffer diameter	250µm
Fiber mode	Single Mode
Insertion Loss	≤ 0.3 dB (1310nm&1550nm)
Return Loss	≥ 40dB
Tighten strenght of naked fiber	>10N
Tensile Strength	>50N
Using Temperature	-40 +85°C
On-line tensile strenght (20N)	IL≤0.2dB
Mechanical durability(500times)	IL≤0.2dB
Drop-off test (drop-off height 4m,once per direction totally 3 times)	IL≤0.3dB

FIBER OPTIC PIGTAILS

FIBER OPTIC PIGTAIL 9/125 OS1/OS2 Fiber Optic Pigtail

FIBER OPTIC PIGTAIL 9/125 Single Mode Pigtail

Pigtail

I²PORT® single-mode pigtails are used in telecom, cable TV networks and high-speed metropolitan and access networks. The single-mode pigtail buffer is manufactured in accordance with IEC, EIA TIA and Telecordia standards. Single-mode pigtails are terminated with a standard I²PORT® connector providing optimum optical performance.

Features

- SC, LC, ST, FC and E2000 connectors
- UPC and APC interfaces
- Low smoke zero halogen (LSZH) secondary buffer
- 900µm tight buffer or easy peel
- ITU G.652.D, TIA/EIA 492CAAB
- Bending strength ITU G.657.A1 or ITU G.657.A2
- Different connector performance range for specific applications
- Standard white color bumper and 12 standard color options according to IEC 60304
- Standard and blister packaging options available

Scope of Application

- Telecom and data communications applications
- Patch panels, wall boxes, ODFs and splice cassettes
- Installation possibility for easy-to-peel pigtails in the field
- Supports high-speed multi-channel video, data and voice services in metropolitan and access networks
- Compatible with ATM, SONET and WDM technologies

Connector Features

Optical Performance	Single mode	Suitability
IL Max/Master(Acceptance)	0,25 dB	IEC 61300-3-4
Ave/Master*	0,18dB	IEC 61300-3-4
Ave/Random*	0,18dB	IEC 61300-3-34
Return Loss	50/60	IEC 61300-3-6

Buffer Features

Features	Units	Simplex
Crushing	N/100mm	500
Operating temperature	°C	~20 to 60
Nominal buffer Diameter	µm	900+50
Maximum Towing Load	N	6

Fiber Properties

Features	
Attenuation (dB)/km	0.38 @ 1310nm / 0.25 @ 1550nm
Chromatic Dispersion (ps/nm x km)	3.0 @ 1310nm / 18.0 @ 1550nm
Polarization Mode Distribution (ps/√km)	≤ 0.2

FIBER OPTIC PIGTAIL 62.5/125 OM1 OPTICAL FIBER PIGTAILS

FIBER OPTIC PIGTAIL 62.5/125 OM1 MULTIMODE PIGTAILS

Pigtail

IPOINT® multimode pigtails are used to interconnect high-speed networks such as Gigabit Ethernet, Fast Ethernet and Ethernet. Multi-mode pigtail buffer complies with IEC, EIA TIA and Telecordia standards. Multimode pigtails are terminated with a standard IPOINT® connector providing optimum optical performance.

Features

- SC, LC, ST, FC connectors
- Low smoke zero halogen (LSZH) buffer
- 900µm tight buffer or easy peel
- OM1 pigtail is available in standard white color
- Multimode fiber complies with ITU-G651, TIA/EIA 492AAAA standards
- Different connector performance range for specific applications
- Standard 12 color options according to IEC 60304
- Standard and blister packaging options available

Scope of Application

- Networks such as Ethernet, Fast Ethernet and GBE
- Internal link
- Ideal for a wide range of telecom, datacom and transaction control applications requiring durability
- Suitable for repetitive operations on patch panels and shelves

Connector Features

Optical Performance	Singlemode	Conformance
Insertion loss	0,30 dB	IEC 61300-3-4

FIBER OPTIC PATCHCORDS

FIBER OPTIC PATCHCORDS

Standard Type Patchcords

ST/PC-ST/PC 9/125 SM SX L:X

SC/PC-ST/PC 9/125 SM SX L:X

FC/PC-FC/PC 9/125 SM SX L:X

LC/PC-FC/APC 9/125 SM SX L:X

Patchcord

A fiber optic patch cord connects two remote fiber optic leads and uses the same type of fiber and connections as the respective fiber ends it connects. In the context of optogenetic experiments, in experiments with a rotary coupler, a fiber optic patch cord is required to connect the light source and the rotary coupler, and another patch cable is used to connect the rotary coupler and the fiber optic cannula.

Automating component preparation and connector polishing processes has an impact on end product parameters. Processes that limit end product quality and measurement verification are limited as follows:

- Visual connector inspection via Westover microscope, automatic scratch and surface detection program
- Attenuation measurement with Insertion Loss (IL) and Return Loss (RL) EXFO
- Interferometer SHUTTLE X for geometric connector measurement

MM Multi Mode

- 62.5/125 OM1
- 50/125 OM2
- 50/125 OM3
- 50/125 OM3+/OM4+OM5
- Giga optimized for 1310nm transmission
- 1000Base-LX do 2000 m

SM Single Mode

- G652D / Low water peak fibre.
- G655/NZDS fiber for CWDW and DWDM transmissions.
- G656/NZDS NZDS fiber for CWDW and DWDM transmissions.
- G657A has a low bending radius for FTTH networks and is compatible with G652.
- G657B / Low bend radius fiber for FTTH networks.

FIBER OPTIC PATCHCORDS

Standard Type Patchcords

Patchcord

IPOINT has perfected fiber optic patch cables with various connectors such as FC, LC, SC, ST, DIN, MU, SMA, MTRJ, E2000 and MPO/MTP. IPOINT is a leading supplier of advanced fiber optic components. Our extensive product range offers a full range of solutions including connectors and adapters, assemblies, termination kits and tools. Each assembly undergoes stringent testing and verification processes before shipment, ensuring you receive the highest quality product. We offer simplex and duplex fiber cable assemblies with ST, SC, FC, LC, MTRJ, MU, D4, DIN, SMA, FDDI, ESCON style connectors. We can also produce custom fiber optic patch cables according to your specifications.

MM Multi Mode

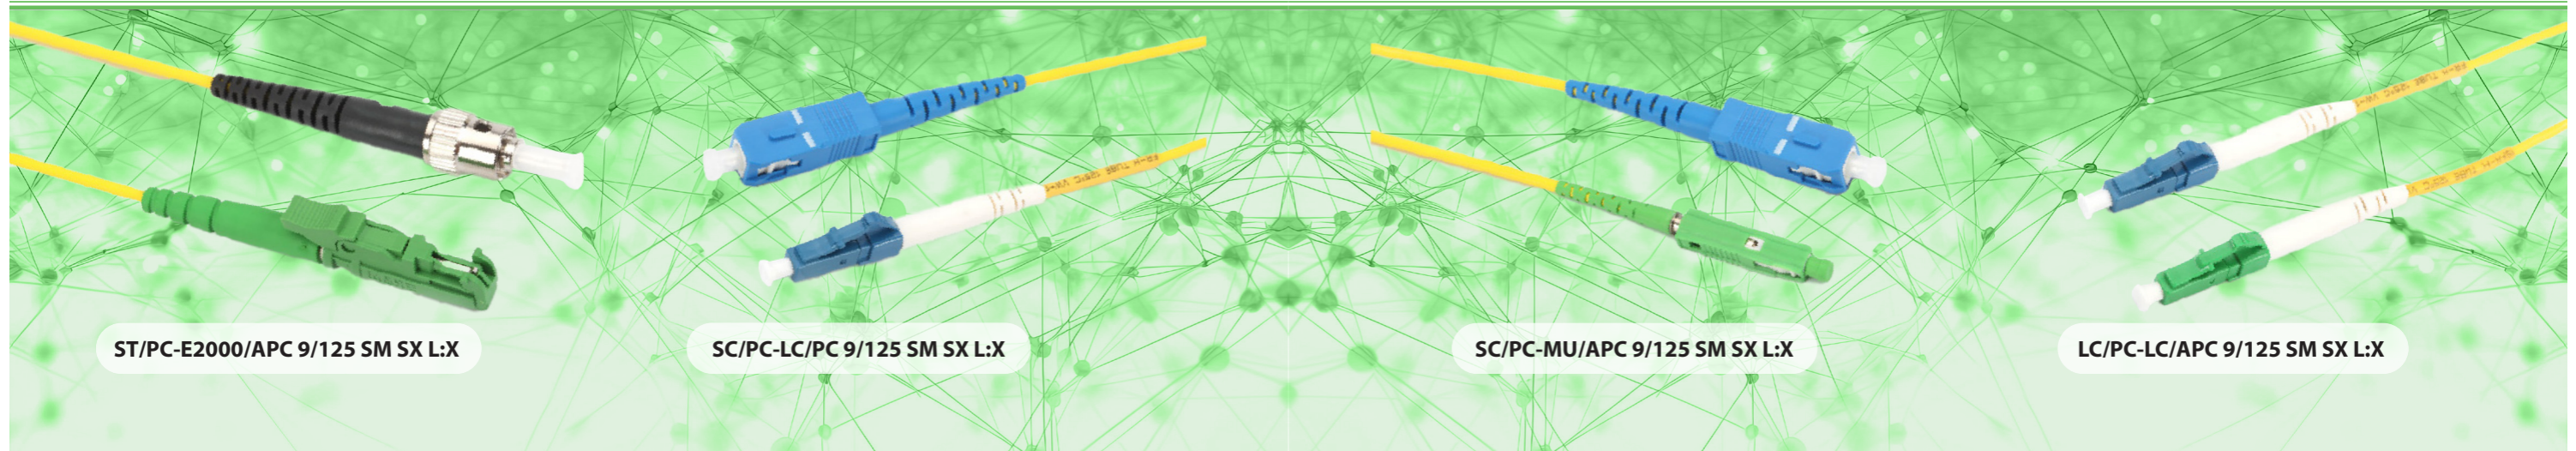

- Terminations: FC, SC, ST, MU, LC, D4, DIN, E2000, MT-RJ, MPO, SMA, E2000, FDDI and ESCON
- Fiber diameter(mm): Φ 0.9, Φ 2.0, Φ 3.0 and customized size
- Fiber type: Singlemode (G.652, G655), multimode (50/125)/ (62.5/125), OM3, OM4
- Types: single-mode, multi-mode
- Insertion Loss (dB): Less than 0.30 (PC and UPC)
- Return Loss (dB): More than 0.45 (PC and UPC)
- Interchangeability: less than 0.20 dB
- Tensile Strength: Less than 0.3 dB (0 to 15 kgf)
- Temperature Range: (- 20 to +60 degrees Celsius)
- Types: PC, UPC, APC
- Radius of Curvature: 10 to 25 mm, 5 to 15 mm
- Apex Offset: \leq 50 μ m; \leq 100 μ m
- Fiber Spherical Height: -90 nm, +50 nm
- Angular Offset: $8^{\circ} \pm 0.5^{\circ}$ (APC)

FIBER OPTIC PATCHCORDS

MTP/MPO Connection Cable

Features

- High Temperature Resistance
- Easy Interchangeability
- Good Durability
- Low Insertion Loss
- High Backscatter Loss
- Standard: Telcordia GR-1435-CORE
- Compatible

Features

- CATV and Multimedia
- Telecommunication Networks
- Active Device Termination
- Gigabit Ethernet
- Connection for O/E Modules
- Data Processing Networks
- Inter-Optical Switch Connection
- Premiz for Installations
- Asynchronous Transmission Mode (ATM) can be mounted in front of ODFs with cable management pieces.

Type	Optical Performance			
	Single Mode (APC polish)		Multimode (PC /Flat Polish)

FIBER OPTIC PATCHCORDS

MTP/MTO Panels and Cassettes

Features

- CATV and Multimedia, Telecommunications Networks
- Active Device Termination
- Gigabit Ethernet
- Connection for O/E Modules
- Data Processing Networks
- Inter-Optical Switch Connection
- Premiz Setups
- Asynchronous Transmission Mode (ATM)
- I²PORT fiber solution supporting high bandwidth,
- Supports data center applications including 10/40/100 Gigabit Ethernet.
- Data Center Infrastructure
- Ethernet, fiber channel, ATM, LAN, MAN and WAN
- Options supporting high-speed Ethernet and Fiber Channel applications (OM3, OM4 and OS1/OS2 fibers)

Features

- High Temperature Stability
- Easy Interchangeability
- Good Durability
- Low Insertion Loss
- High Backscatter Loss
- Standard: Telcordia GR-1435-CORE
- Compatible
- Supports up to 12 x 24 fiber MPO Cassettes
- Multiple adapter options available
- Accepts loose tube, distribution cable and MPO Trunk Cable
- Standard 19 inch rack compatible

Type	Optical Performance			
	Single Mode (APC polish)		Multimode (PC /Flat Polish)	
Performance	Standard	Elite Low Loss	Standard	Elite Low Loss
Maximum Insertion Loss	≤ 0.70 dB	≤ 0.30dB	≤ 0.60 dB	≤ 0.35dB
Return Loss	≤ 50 dB		≤ 30dB	
Operating Temperature	-40°C to 80°C		-40°C to 80°C	
Test Wavelength	1310nm or 1550nm		850nm or 1300nm

Tensile Strength	> 15kg		> 15kg	

FIBER OPTIC PATCHCORDS

Fiber Optik Special Patchcords | Armored & Fan-out Patchcords

Special Patchcords

Thanks to the stainless steel tube inside the outer sheath, armored fiber optic patch cords are designed for use in harsh environments. These cables contain a stainless steel tube that provides protection to the cable center unit. In addition to being both strong and durable, they are also easy to use like electrical cables.

Armored fiber optic patch cords are strong yet retain all the features of standard patch cords. They won't get damaged even if stepped on by an adult, and they're also rodent-proof, so you don't have to worry about animals like mice biting and breaking the cables.

Although strong, armored fiber optic patch cords are actually just as flexible and bendable as standard patch cords. They have similar outer diameters to standard patch cords, which saves space. They are available with different sheath colors and sheath types like OFNR

and can be terminated with different connector types like SC, ST, FC, LC, MU, SC/APC, ST/APC, FC/APC, LC/APC.

I^{PORT}'s armored fiber optic patch cables are specifically designed for use in harsh environments where standard cables cannot perform well. It comes equipped with strong connectors and armored cables, protecting the cables from damage caused by bending, exposure to pressure, or rodent bites. It is also easy to install and maintain. It is an ideal option for those looking for lightweight, durable and protected fiber optic patch cables.

Fan-Out Patchcords

- 4, 8, 12, 24 and 48 fiber fan-out patchcords, SC, LC, FC etc. Available in all desired lengths with connectors.
- Pre-terminated multi-fiber cable helps speed installation and improve connection reliability.
- Field-mountable cable modules are easily mounted to the front of the ODFs via cable management pieces.

FIBER OPTIC PATCHCORDS

Armored & Fan-out Patchcords | Fiber Optik Special Patchcords

Type	Single Mode	Single Mode	Multi Mode
Insertion Loss	0.2 dB	0.2 dB	0.2 dB
Return Loss	55 dB	75 dB	45 dB
Storage Temperature	-40 C to +90 C	-40 C to +90 C	-40 C to +90 C
Operating Temperature	-40 C to +90 C	-40 C to +90 C	-40 C to +90 C
Reproducibility of IL		0.1 dB	
Service Life		1000 mate/match cycles	

- Any connector other than MTRJ, ESCON and FDDI can be used.
- Durability is 25 times stronger than standard patchcords.
- Ideal against mice.
- Simple cable thickness can be reduced to 2.8 mm.
- Full armor integrity is ensured for duplex and fan-out applications.

FIBER OPTIC PATCHCORDS

Fiber Optic Special Connection Cable | Armored Connection Cables

Features

- Made with armored optical cable, flexible metal tube protects the fiber optic cable.
- High pressure resistance, stamp durability and rat ant bite resistant.
- Small diameter, bending resistant and optimal flexibility.
- Aramid yarn reinforced optical cable has superior extension durability and is safe and reliable when connected with fiber optic connector.
- It can be used directly in various environments.
- In the indoor area, there is no need to use protection pipe and it is convenient for network operation and maintenance.

Scope of Application

- Gigabit Ethernet
- Telecommunication Networks
- Active Device Termination
- Image
- Industrial
- Multimedia
- Military
- On-Site Installations

Type	Optical Performance	
	Single Mode (APC polish)	Multimode (PC /Flat Polish)
Insertion Loss	≤ 0.2 db	≤ 0.2 db
Return Loss	PC > 45 dB UPC > 55 dB APC > 65 dB	UPC > 55 dB
Repeatability	≤ 0.1 db	≤ 0.1 db
Durability	≤ 0.2 dB	≤ 0.2 dB
Interchangeability	≤ 0.1 dB	≤ 0.1 dB
Tensile Strength	> 15 kg.	> 15 kg.
Operating Temperature	-40 °C to 85 °C	-40 °C to 85 °C
Storage Temperature	-40 °C to 85 °C	-40 °C to 85 °C

FIBER OPTIC PATCHCORDS

Multi Fiber Fan-Out Connection Cable | Fiber Optic Special Connection Cables

Features

- Number of fibers between 4 and 144
- Indoor and outdoor applications
- Single cable assembly with multi fiber termination
- Available in various connector types
- Custom configurations for cable and fan-out style/length
- Fan-out cable size: 0.9 mm, 2.00 mm and 3.00 mm

Features

- Telecommunication Networks
- Outdoor Plumbing
- Indoor Networks
- Overhead Distribution

FIBER OPTIC PATCHCORDS

Fiber Optic Special Connection Cables | RRU Fiber / Branch Cable (Multi Mode)

RRU Branch Cable (50/125 Multi Mode)

Cable assembly designed for FTTH is suitable for indoor and outdoor use. The cable is terminated with LC duplex at both ends. Optical fiber cable type and specifications GYFJH 2a1a, (0.40dB/km at 850nm and 0.25dB/km at 1300nm). Cable sheath must be made of halogen-free flame retardant material, black, OD=7±0.2mm

Scope of Application

- 3G 4G base station usage
- Aviation and Defense
- Equipment diagnostics
- fiber optic sensor
- FTTH, FTTP, FTTX, WIMAX
- BBU, RRU, RRH, LTE
- Signal optical and remote fiber hunting etc. in outdoor RRU. The product used to transmit; secure screw connection
- Protection Level is IP67
- Low/add return loss, optically stable broadcast

Features

- Entrance Collar: Copper alloy
- Fiber Jacket: (FR) PE, LSZH
- Fiber Type: G.652D, G657, G657A2, G657A2/B2, Multimode
- 2 Fiber or 4 Fiber on request
- Water and dust proof, conforming to IP 67
- LC, SC, MU, etc. connector option
- Pulling force > 300N
- Insertion Loss: Typical 0.25 dB/km @1310 nm
- Return Loss (for single mode): > 50 dB for UPC, > 65 dB for APC
- Operating Temperature: -40 C / +80 C
- Minimum installation temperature: -20 C
- Storage temperature: -40 C / +70 C

FIBER OPTIC PATCHCORDS

Fiber Optic Special Connection Cables | RRU Fiber / Branch Cable (Single Mode)

RRU Branch Cable (9/125 Multi Mode)

Cable assembly designed for FTTH is suitable for indoor and outdoor use. The cable is terminated with LC duplex at both ends. Optical fiber must comply with the ITU G.657A2 standard (0.40dB/km at 850nm and 0.25dB/km at 1550nm). The cable sheath must be made of halogen-free flame retardant material, black, OD=7±0.2mm.

Scope of Application

- 3G 4G base station usage
- Equipment diagnostics
- FTTH, FTTP, FTTX, WIMAX
- BBU, RRU, RRH, LTE
- Optical signal and remote fiber feeder etc. in outdoor RRU. The product used to transmit; secure screw connection
- Protection Level reaches IP67
- Low insertion/return loss, stable optical transmission

Features

- Fiber Jacket: (FR) PE, LSZH
- Fiber Type: G657A2/B2
- 2 Fiber or 4 Fiber Optionally
- Water and dust proof, conforming to IP 67
- LC, SC, MU etc. connector option
- Pulling force > 300N
- Insertion Loss: Typical 0.25 dB/km @1310 nm
- Return Loss (for single mode): > 50 dB for UPC, > 65 dB for APC
- Operating Temperature: -40 C / +85 C
- Minimum installation temperature: -15 C / +60 C
- Storage temperature: -40 C / +70 C

FIBER OPTIC PATCHCORDS

Fiber Optic Special Patchcords | Loopback Connection Cables

Features

- High temperature resistance
- Easy interchangeability
- high durability
- Low insertion loss
- High back reflection loss
- Standard:TIE/EIA 568-A Compliant
- Compatible with Fast Ethernet, Fiber Channel, Gigabit Ethernet etc.
- Custom mounts available

Scope of Application

- CATV and Multimedia
- Telecommunication Networks
- Connection for O/E Modules
- Data Processing Networks
- Optical Key Frame Connection
- Asynchronous Transmission Mode(ATM)
- Used in fiber optic tests
- network restorations

Specifications	
Typical Insertion Loss	≤ 0.70 dB
Connector Type	SC / LC / MU etc available
Maximum Insertion Loss	SM / MM available
Return Loss	0.9 mm / 2.0 mm / 3.0 mm / 0.25 mm Repeatability ≤ 0.2 (500 matings)

FIBER OPTIC PATCHCORDS

Extended Beam Connection Cables | Fiber Optic Special Connection Cables

Extended Beam Connection Cables

EB connector systems are designed for military and industrial harsh environments. Fiber optic ferrules do not physically come into contact with their counterparts, thus preventing possible damage to the optical fiber surface. Instead of physical contact, the optical fiber is protected behind hard-coated extended beam lenses. Even if the connector falls into the mud, it is simply cleaned and then easily reconnected with the optical connection.

I²PORT manufactures extended beam cable systems for the Turkish Army, Armed Forces and companies such as Aselsan for harsh environment areas around the world

Extended Beam Connection Cables

<p>Indoor Clean Environmental Conditions Temperature Control Sparse Connection</p> <p>✓</p> <p>PHYSICAL CONTACT</p> <p>✗</p>	<p>Outdoor Harsh Environmental conditions Air Extremities Frequent Deployment</p> <p>✓</p> <p>EXPANDED BEAM</p> <p>✓</p>
<ul style="list-style-type: none"> • Physical contact connectors are where fibers are normally assembled in a cylindrical ferrule. This ferrule tip is then specially polished, allowing two ferrules to be joined together. This provides a fiber connection that is aligned using high precision components. 	<ul style="list-style-type: none"> • Extended beam connectors are where a lens is placed in front of the fiber to expand the light beam. The expanded beam is then refocused on the fiber of the matching half. The distance between mating halves is variable

LAN CABLES

LAN Cables UTP Cat5e Stranded

Features and Advantages

- It has CAT5e standard features
- Can be used for CAT5e patch cables
- Available in different colors on request.

Structure

Conductor (diameter mm): 26AWG Stranded BC
 Insulation (diameter mm): HDPE
 Sheath (diameter mm): PVC/LSZH 5.4
 Number of pairs: 4

Technical Specifications

- Temperature range(C°): -20 to 70
- Speed ratio (%): 66
- Linear resistance (max.): <170 Ohm/km
- Common capacitance (nom.): 50 pF/m
- Characteristic impedance:
- (1 to 100 MHz)100±15 Ohm
- Bending radius (min.): 8 x cable diameter
- Flame retardant: CMP, CMR, CMG, CM
- UL file number E334179

Conductivity Properties

Frequency (MHz)	Insertion Loss (dB/100m)	Next Loss (dB/100m)	Return Loss (dB/100m)
1 MHz	3.0	65.3	20.0
4 MHz	6.2	56.3	23.3
10 MHz	9.8	50.3	25.0
16 MHz	12.3	47.2	25.0
20 MHz	14.0	45.8	25.0
25 MHz	15.7	44.3	24.2
31.25 MHz	17.7	42.9	23.3
62.50 MHz	25.6	38.4	20.7
100 MHz	33.0	35.3	19.0

Standards And Performance

- CABLE: - IEC 61156

FIBER OPTIC ADAPTERS

FIBER OPTIC ADAPTERS

FIBER OPTIC ADAPTERS

Adapters

Fiber optic adapters are used in fiber optic connections, their typical use is to provide a cable to cable fiber connection. People sometimes also call them matching sleeves and hybrid adapters, matching sleeves means this fiber optic adapter is used to connect the same type of fiber optic connectors while hybrid adapters are types of fiber optic adapters used to connect different types of fiber optic connectors. IPOINT fiber optic adapters are known for their stability, providing reliable solutions for fiber connections, single mode fiber optic adapters and multimode fiber optic adapters are available on request. IPOINT adapter uses high quality raw materials and this fiber optic produces the adapters strictly according to international standards, which makes our fiber optic adapters fully compatible with other manufacturers' products on the market. IPOINT fiber optic adapters are of high quality and there are many different types to meet different customer needs.

Scope of Application

- Telecommunication Networks
- CATV Networks
- Metro Networks
- Cable TV Applications
- Data Processing Networks
- LAN and WAN
- Industrial, Military and Medical Applications
- Broadband
- Multimedia
- Active Device Termination
- Measurement and Control Systems
- Telecommunications and Computer Networks
- FTTx, FTTH

Features

- Compliant with Telcordia, ANSI, TIA/EIA and ISO standards
- Highly stable pairing and separation properties
- Available with ST, SC, FC and LC connectors
- Standard products are available as pigtailed
- Pre-installed tow eye kits available
- Low Insertion Loss and High Return Loss
- High Reliability and Stability
- Correct Dimensions
- Single and Double Panel cuts
- Available without flanges or with flanges for double, saving panel space
- Conforms to JIS5974 and bellcore GR-326 standard
- Compliant with IEC874-14 and IEC874-19
- RoHS compliant

FIBER OPTIC ADAPTERS

Locking Adapters

What are the advantages?

- Break traditions!
- Quick installation!
- Quick connection!
- Save your time!

- First, snap the headboard into place.
- Lock the metal parts on the side by squeezing them.

Shutter Adapter

Shutter Adapter

- IPORT has released a curtain adapter with a special design that effectively protects the connector ferrule from dust.
- IPORT is fully automatic and provides all the necessary eye protection from harmful light without the need for manual intervention.
- IPORT internal curtain adapters are available with zirconia or phosphor bronze alignment sleeves in SC simplex/duplex and LC duplex/quad designs and in flanged or flanged body types.

Fiber Optic Attenuators

ATTENUATORS

Fiber Optic Attenuators

FO-0702MP4X
SC/PC XdB Attenuator

FO-0702MA4X
SC/APC XdB Attenuator

Features

- Insensitive to polarization
- Compact plug-style design fits easily into existing patch panels
- Attenuation values from 1 dB to 30 dB are available
- Low back reflection
- Wide wavelength range
- Designed to meet Telcordia requirements

✓ IPOINT offers high quality build-out attenuators in the 1 to 30dB range. Each attenuator is made with continuous light-absorbing and metal-ion fiber, offering excellent environmental stability and low back reflection. The front of the attenuator is male plug connector style, allowing attenuators to be plugged directly into receiving equipment or adapters on the patch panel. The back side is a female socket adapter and allows a patch cable to be plugged into the back of the attenuator. The attenuator is available in SC, FC, ST, LC and MU types. In a fiber optic system, build out attenuators play an important role in controlling optical power levels in Telecommunications, CATV applications and other single-mode fiber optic communications applications. Therefore, it must deliver consistent performance over a range of operating conditions so that attenuation levels remain constant and predictable.

Applications

- Instrumentation
- Telecom head office
- Telecommunication networks
- CATV headend, LAN networks
- Data communication networks
- Testing and Measurement
- Channel balancing for WDM systems
- Optical transmission systems
- Fiber optic distribution frame
- Fiber optic network system

Technical Specifications

Back Reflection/Return Loss	Super polish : ≤-45 dB Ultra polish : ≤-55 dB Angle polish : ≤-65 dB
Operating Wavelengths	1310/1550nm (CenterWavelength)
Operating Bandpass	1260 to 1360nm and 1430 to 1580nm
Attenuation Level	1-9dB (±0.5dB);10-20dB (±5%)
Attenuation Tolerance	±0.5dB (1-9dB); 5±% (10-20dB)
Polarization Dependent Loss	≤0.5dB
Operating Temperature	-20°C ~70°C
Storage Temperature	-40°C ~80°C

quality

 **Optical Attenuators** An optical attenuator is a device used to reduce the power level of an optical signal. They come with ceramic launchers and come in a variety of types to fit different types of fiber optic connectors. Fiber optic attenuator is divided into multi-mode and single-mode. I^{PORT} offers all types of single-mode and multi-mode fiber optic attenuators, such as: FC/PC, FC/APC, SC/PC, SC/APC, LC/PC, LC/APC, ST, MU, E2000, Fixed Adapter Type Attenuators, Fixed Inline Type Attenuators, etc. all available.

FIBER OPTIC SPLITTERS

FIBER OPTIC SPLITTERS

FIBER OPTIC SPLITTERS

Features

IPOINT couplers and splitters use precision technology to combine or distribute light from single/multiple inputs to single/multiple outputs. Most couplers and splitters are designed to be bi-directional, allowing the same product to be used as a coupler or splitter.

IPOINT couplers and splitters are available in a variety of styles, sizes, splitting values and wavelength specifications, providing high flexibility to tailor the product exactly to your needs and application. High definable mating rates allow the product to meet precise needs. Multiple port configuration, connector and finish options make IPOINT couplers and splitters an ideal option for

specific requirements and provide seamless integration into existing systems.

IPOINT offers the full range of 1xN and 2xN plc splitters. It is available in a flexible 1U 19" rack mount box and comes in Fan-out kits and blockless type with terminated, terminated or unterminated ends and small plastic ABS box and Standard LGX metal box for outdoor use.

Our plc splitter products are guaranteed of high quality and best price. We can customize Planar Lightwave Circuit Splitter (plc splitter) to fit your specific requirements.

Scope of Application

- Fiber to homes (FTTH)
- Local loop (Local loop)
- Passive optical networks (PON)
- Fiber communication systems
- Fiber optic test systems
- Fiber optic detection
- Local areas (LAN)
- Fiber in the loop
- Local area network (Local area network)
- Cable television (CATV)
- Fiber optic detection
- test equipment

Features

- Optical performance 100% factory tested
- UPC and APC finish types available for products with connectors
- Low Insertion Loss, Back Reflection and PDL
- Telcordia GR-CORE 1221 certified
- Working Window 1260~1650nm
- Polarization Stability (dB) ≤ 0.50dB
- Port Configuration 1X2,1x4, 1x8, 1x16, 1x32,1x64
- 2X2,2X4,2X8,2X16,2X32,2X64
- Back Reflection (dB) ≤ -55 UPC ≤ -65 APC
- Operating Temperature (°C) -20~+70
- Storage Temperature (°C) -40~+85
- Low excess loss
- Low PDL
- Hing versatility
- Long distance reliability
- Customer defined specifications

Features

- Up to 12 Fo connections
- Only available to fit adapter type
- You can apply ST/SC/FC/E2000/MU/MTRJ/LC
- Rail
- Maintains fiber bend radius for optical fibers terminated at 30 mm
- Units can be custom design
- Compatible with screw adapters and screwless type adapters
- Available with:
 - Pigtail
 - Special splicing cassette
 - Heat Shrink joint protectors

Technical Specifications

Size (w:19 , h:1U)	(w):485mm x (d): 265mm x (h):44.50mm

IPOINT Fiber Optic Termination Boxes are used for termination and distribution of optical fiber cables. The termination box has a range from 12 ports to 216 ports. They are practical equipment for organizing and connecting fiber optic connections. Telecommunication network, central office optical cable system and building.

It is suitable for uses such as fiber networks. Each fiber optic termination box is fully equipped with adapters, splice trays and accessories and is ready for installation. IPOINT offers kinds of sliding type fiber optic patch panels with different optical adapter interface.

Features

- Fo connection up to 24-96
- Only available to fit adapter type
- You can apply ST/SC/FC/E2000/MU/MTRJ/LC
- without rails
- Maintains fiber bend radius for optical fibers terminated at 30 mm

ROHS P 1/2 F
PLASTIK PORT FULL

OPTICAL DISTRIBUTION BOXES

1/2 Port Wall Mount Type | Plastic ODB Boxes

Overview

Multi-function fiber optic terminal box is a new product we designed for FTTH engineering.

The box is light and convenient, especially suitable for providing protection for cable and pigtail.

Universally usable with standard A86 splice box, particularly suitable for indoor wiring and rapid field installation. The mechanical connector is used to connect with indoor soft cable. Two cover designs meet different demands. Traditional box lid design can meet regular and new customer requirements. The new rotating shaft design makes it easier to use.

SC adapter and LC adapter are suitable.

Applications

- Optical Networks
- In-home applications
- Fiber to the home

Links

- Number of terminations 1 SC
- Simplex or 1 LC Duplex
- Termination types are SC,LC per BOX.
- Recommended patchable thickness 2-3 mm

Benefits

- Breakout cable entry
- SX/DX cable entry - Waterproof silicone seals
- cable fixing
- Plate fixing
- adapter holder
- safe lock
- ground pin
- Insertion tray location

Technical Specifications

Item	Technical Parameters
Dimensions	8,5mm (w)X8,5mm(H)X2mm(D)
Weight	Approx 58 gr
Mounting	Wall mounted
Material	ABS
Operating Temperature	-40/+60
Operating Humidity	0 to 90%
Port output	1/2
Applicable for	3.1 x 2.0 mm Drop cable & indoor cable
Optical fiber diameter	125 μ m (652 & 657)
Tight buffer diameter(μ m)	250 μ m & 900 μ m
Fiber mode	Single & multi mode
Tensile strength	>50 N
Adaptor	SC/LC
Vibration	10 ~ 55 ~ 10HZ / 10 min in 2 hours

Kutu boyunca minimum bükülme yarıçapı 30 mm olup, lazer radyasyonu koruması sağlanmaktadır. Adaptör konumu, maruziyeti önler.

OPTICAL DISTRIBUTION BOXES

3/6 Port Wall Mount Type | Plastic ODB Boxes

Overview

Designed by IPOINT for indoor use. It has ideal flexibility for fiber table applications.

Since it looks like a telephone box, it does not disturb you inside the house.

Benefits

- Easy to reach patch in an area.
- The separated joint in the upper position is preserved.
- The cable is simplified to facilitate installation routing.
- The slim splice cassette and mini splice guard provide easy finishing benefits.

Applications

- Optical Networks
- In-home applications
- Fiber to the table

Links

- Number of terminations 4 Poles
- Termination types are SC, LC, ST, FC per box.
- Recommended patchable thickness 2-3 mm

Technical Specifications

Dimensions	120mm (w) X 80mm (H) X 25mm (D)
Weight	Approx. 86g.
Mounting	On wall
Material	ABS
Operating Temperature	-40° to 60° C
Operating Humidity	0 to 90%
IP rating	IP53
Vibration	10~55~10Hz / 10 Min in 2 Hours

The minimum bending radius along the box is 30 mm, providing laser radiation protection. Adapter location prevents exposure.

OPTICAL DISTRIBUTION BOXES

12/24 Port Wall Mount Type | Plastic ODB Boxes iPlay Series

Overview

IPOINT's outdoor fiber wall mount distribution boxes are designed to offer the most flexible solution for all FTTx networks. A single flexible distribution box that can be pole or wall mounted, making it an ideal fit for today's FTTx networks.

All passive optical network components are housed in a single enclosure offering the highest level of cable management.

Benefits

- Breakout cable entry
- Sx/Dx cable entry - Waterproof silicone seals
- cable fixing
- Plate fixing
- adapter holder
- safe lock
- ground pin
- Insertion tray lock

Applications

- Optical networks
- Attempt
- FTTx

Links

- Number of terminations 12 SC Simplex or 24 LC Duplex
- Termination types are SC, LC per BOX.
- Recommended patchable thickness 2-3 mm

Technical Specifications

Dimensions	210mm (w) X 150mm (H) X 50mm (D)
Weight	Approx. 550 gr
Mounting	Wall Mounted
Material	ABS 757
Operating Temperature	-40 / +60
Operating Humidity	0 to 90 %
IP rating	IP67
Vibration	10-55-10HZ / 10 min for 2 hours

The minimum bending radius across the box is 30mm and the box provides protection against laser radiation.
» Adapter location prevents exposure. The ODB box can be opened up to 270°.

Overview

IPOINT'un iç/dış mekan duvara monte fiber dağıtım kutuları, tüm FTTx uygulamaları için en esnek çözümü sunmak üzere tasarlanmıştır. Direğe veya duvara monte edilebilen bu çok yönlü dağıtım kutusu, bugünün FTTx ağları için ideal bir uyum sağlar.

Tüm pasif optik ağ bileşenleri, en yüksek düzeyde kablo yönetimi sunan tek bir muhafazada yer almaktadır.

Benefits

- Hinged Patch Area for Custom Patch Area - Attachment is protected in a separate area below.
- Wide open circuit identification of all patch locations.
- Injection molded cable routing arrows to facilitate installation.
- Hinged Connection Tray protects PON Components and Splicing area
- Split Cable Grommets make it easy to install Pre-Terminated Cables
- The included universal cable clamp is supplied as standard, including the centre-strength member holder.
- Splicing Tray is supplied as a 2x16 splicing guard

Applications

- Optical networks
- Attempt
- FTTx

Links

- Number of terminations per box 16 for SC (Simplex) or 32 LC (Duplex)
- Termination type SC, LC
- Supported multi-fiber cables OSP and IFC (Max. 16 mm)
- Supported patch cords 2-3mm recommended

Technical Specifications

Dimensions	255mm (w) X 310mm (H) X 100mm (D)
Weight	1,2 kg
Mounting	Wall Mounted
Material	ABS
Operating Temperature	-40° to 60° C
Operating Humidity	0 to 90%, non-condensing
IP rating	IP 65 (IP 67 tests ongoing)
Vibration	10~55~10Hz / 10 min for 2 hours

The minimum bending radius across the box is 30mm and the box provides protection against laser radiation. Adapter location prevents exposure. The ODB box can be opened up to 270°.

Benefits

- Easily accessible patch within the area.
- The reserved splice area is preserved in the upper position.
- Cable routing has been simplified to facilitate installation.
- Thin splice cassette and mini splice protector provide easy termination advantages.

Applications

- Optical Networks
- indoor applications
- Fiber to the table.
- Number of terminations: 16 SC Simplex or 32 LC duplex.
- SC, LC termination types per box.
- Recommended patch thickness is 2-3mm.

Technical Specifications

Weight	Approx. 100g.
Mounting	On wall
Material	ABS
Operating Temperature	-40° to 60° C
Operating Humidity	0 to 90%
IP rating	IP53
Vibration	10~55~10Hz / 10 Min in 2 Hours

Kutu boyunca minimum bükülme yarıçapı 30mm'dir ve kutu lazer radyasyonuna karşı koruma sağlar. Adaptör konumu maruziyeti önler. ODB kutusu 270°'ye kadar açılabilir.

OPTICAL DISTRIBUTION BOXES

16/32 Port Splitter Type | Plastic ODB Boxes iPlay Series

Benefits

Applied to optical access point, FTTX and GPON. It completes the entry and fixing of optical cables, provides splice operations, termination, storage and management of fibers, and fixes and cross-connects optical fibers. Optical partitioning and capacity expansion can be achieved by installing optical splitters. The main cable can be spliced or separated from it, which not only meets customer's needs but also improves production efficiency.

Technical Specifications

- Operating temperature: -40°C ~ +70°C
- Storage temperature: -30°C ~ +60°C
- Relative humidity: ≤ 95% (+30°C)
- Atmospheric pressure: 70 Kpa ~ 106 Kpa
- Clear identification to avoid possible malfunctions caused by disassembly during maintenance
- Durability of adapter: 500 times
- Bending radius: 30mm
- Flammability: Compliance with GB5169.7 Test A
- Connector insertion loss: ≤ 0.20 dB
- Return loss: APC ≥ 60dB, UPC ≥ 50dB
- High voltage protection and grounding
- Insulation resistance: ≥ 1000MΩ/500VDC
- Withstand voltage: ≥ 3000VDC, no malfunction and electric arc within 1 minute

Applications

- High quality cold rolled steel sheet, excellent anti-corrosion ability
- Clear fiber connection and management labels, ease of use
- Applicable for 1(2)X8 or 1(2)X16 MINI packet separator
- Available in simplex SC/APC adapters.
- double swinging door

Fiber Optic Enclosures | Dome Type Closures

12 PORT 1 Cassette / Enclosures
FO-08D12M61S

Advantages

It is a solution that provides quick and easy re-access while protecting fiber optic splices. It can be installed outdoors, in drains, canals and poles. The closure offers reliable sealing performance and protects the fiber joint within an embossed polypropylene dome with high mechanical and environmental properties. Having six input ports, the closure is suitable for inline or mid-point branching method.

Features

- Hot melt type maintains leak-proof, reliable, moisture-proof
- Embossed body structure provides protection against impact and pressure
- Efficient fiber management with Enclosures structure
- Ease of cover installation
- Voltage element and ground are easily clamped

FIBER OPTIC ENCLOSURES

Fiber Optic Enclosures | Dome Type OPGW Enclosures

Advantages

IPOINT OPGW and ADSS fiber optic termination box is used to protect the fiber optic connection between two cables and reserve a fiber optic section for maintenance in the box. The box has good sealing, waterproof and moisture protection properties, and will not corrode on the power line. There are two types of junction boxes, central and terminal type. The central type is used in the central part of the line to protect two combined cables, while the terminal type is used at the end of the line to protect the branching or fiber optic connection and jumper in the cable line.

Features

- Sealing: After the can is closed, inflate the can to 100 kPa, and then observe the can immersed in the normal temperature water container for 15 minutes. No bubbles should escape.
- Insulation resistance: The insulation resistance between equipment and ground should be $2 \times 10^4 \text{ M}\Omega$ or greater.
- Pressure resistance: There should be no distortion and no flashover between the equipment and ground for 15kV (DC) / 1 minute.
- Fiber optic bending radius: $\geq 30\text{mm}$ (less than 40mm) and there should be no additional attenuation in the fiber optic fusion splice protector.
- Tensile strength: It must withstand equal or greater axial tensile stress up to 1000N.
- Lifespan: 25 years.

Technical Specifications

- Fiber curvature radius $\geq 43 \text{ mm}$.
- The fiber length of the plate remains $\geq 1500\text{mm}$.
- Additional attenuation of optical discs shall remain at $\leq 0.01\text{dB}$.
- Maximum fiber optic capacity ≤ 144 core optical fiber.
- Suitable temperature range $-40 \text{ }^\circ\text{C} \sim +80 \text{ }^\circ\text{C}$.
- Straightening performance 2000N/100mm.
- Weight 6.7 kg.
- Overall dimensions 480 mm (H) \times 200 mm (ϕ).

Accessory List

- 1 piece for hot expansion tube connection
- Fiber tube 2-5 meters
- Protective Optical Fiber Tube 2-6 sets
- Lashing strap 4-12 meters
- Anti-theft binding 1 roll
- Adhesive tape 1 roll
- 1 roll of electrical tape
- Small tire 1pc
- MDF pressure logo 1 set
- Sandpaper 1 piece
- Diameter Adjuster Gasket 1 set
- M12 center bolt 1 set special for the tower
- Logo mark and Coding 1 set
- Work Gloves 1 set
- Product qualification certificate 1 piece
- Product instruction 1pc

FIBER OPTIC TEST EQUIPMENT

FIBER OPTIC TEST EQUIPMENT

Fiber Optic Light Source

Fiber Optic Light Source
FO-TF1000

Fiber Optic Light Source

FO-TF1000 Fiber optic light source is a fiber optic testing equipment used to measure fiber optic loss for both single mode fiber cables and multimode fiber cables; often used with fiber optic power meters. This fiber optic light source, 650nm LED source can provide wavelength output according to specific requirements,

including 1310nm/1550nm wavelength for single-mode fiber and 850nm/1300nm wavelength for multi-mode fiber. When used in conjunction with our fiber optic power meter, they serve as an economical and efficient solution for fiber optic network work.

Features

- It optionally provides output from 1 to 6 wavelengths according to customers' needs.
- It provides CW, 2Hz modulation output at 650nm and CW, 270Hz, 1KHz, 2KHz modulation output at other wavelengths.
- High output power stability.
- Stable output wavelength.
- LCD screen with backlight, supporting night work.
- Low battery consumption.

Scope of Application

- Telecommunications maintenance
- CATV maintenance
- Fiber Optic Laboratory Tests
- Used for other Fiber Optic Measurements

Technical Specifications

Wavelengths(nm)	Provides 1~6 Wavelengths according to needs
Emitter Type	FP-LD,LED
Typical Output Power(dBm)	0@650nm / -7 @1310nm,1550nm, -20dBm for LED
Spectral Width(nm)	≤10
Output Stability	±0.05dB/15mins; ±0.1dB/ 8hours
Modulation Frequencies	CW,2Hz@650nm / CW,270Hz,1KHz,2KHz@1310nm, 1550nm
Optical Connector	FC/PC(Other type adapters can be required)
Power Supply	Alkaline Battery(3 AA 1.5V batteries); AC Adaptor(9V)
Battery Operating Time(hour)	45
Operating Temperature (C°)	-10~+60
Storage Temperature (C°)	-25~+70
Dimension(mm)	190X100X50
Weight(g)	370

FIBER OPTIC TEST EQUIPMENT

Fiber Optic Power Meter

Fiber Optic Power Meter
FO-TF2000

Fiber Optic Power Meter

FO-TF2000 Fiber optic power meter is a tester used for absolute optical fiber power measurement as well as fiber optic loss related measurements. This handheld fiber optic test equipment has a

stylish appearance and offers a wide power measurement range, high precision test accuracy and user automatic self-calibration. Fiber optic power meter is used for telecommunications and CATV networks.

Features

- Wide dynamic measurement range (up to 80dB)
- Reference power level storage (Ref Setting)
- User self-calibration function
- Comfortable LCD screen and backlight LCD screen support night work.
- Power measurements in dBm or mW and insertion loss measurements in dB
- The 10-minute auto shut-off function can be enabled or disabled. AA alkaline batteries last over 140 hours, AC adapter also available.
- Low battery warning

Scope of Application

- Telecommunications maintenance
- CATV maintenance
- Fiber Optic Laboratory Tests
- Used for other Fiber Optic Measurements

Technical Specifications

Wavelengths(nm)	800nm~1700nm
Detector Type	InGaAs
Detector Size	Ø 1.0mm
Measurement Range (dBm)	-70~+10 -50~+30
Uncertainty	±5%
Calibrated Wavelength(nm)	850,1300,1310,1490,1550,1625
Resolution(dB)	0.01
Optical Connector	FC(interchangeable SC,ST) / as well as 2.5mm universal
Power Supply	Alkaline Battery(3 AA 1.5V batteries); AC Adaptor(9V)
Battery Operating Time	140 h with 1.5V Battery(3pcs)
Operating Temperature (C°)	-10 ~ +60
Storage Temperature(C°)	-25 ~ +70
Relative Humidity	0 to 95% (non-condensing)
Dimension(mm)	190X100X50
Weight(g)	370

FIBER OPTIC TEST EQUIPMENT

Fiber Optic Handheld Power Meter

Fiber Optic Handheld Power Meter
FO-TF6000

Fiber Optic Handheld Power Meter

FO-TF6000 Fiber Optic Handheld Power Meter is a newly designed fiber optic tester by IPOINT. It is used for fiber network installation, fiber network engineering acceptance and fiber network maintenance. Compared to normal power meters, TF6000 features

automatic wavelength recognition and switching and provides intelligent backlight control. Besides, TF6000 has good appearance, good touch feeling and thoughtful people-oriented design.

Features

- Wave ID - Automatic wavelength recognition and switching (when used with TF1000 light source)
- Frequency ID/Tone detection - Automatic frequency recognition
- Intelligent backlight control (light intensity can be appropriately adjusted according to the environmental light, greatly reducing power consumption)
- Data storage function, up to 1000 test records
- USB communication port for downloading saved test records
- Reference power level can be set and stored
- User self-calibration function
- Auto shut-off function can be enabled or disabled
- AA alkaline battery and AC adapter for power supply
- Low battery warning

Scope of Application

- Telecommunications maintenance
- CATV maintenance
- Fiber Optic Laboratory Tests
- Used for other Fiber Optic Measurements

Technical Specifications

Communication Port	USB
Optical Connector type	FC, SC, ST interchangeable (LC, FC, SC, ST interchangeable can be)
Alkaline battery	3*AA, 1.5V
Power Supply Adaptor (V)	8.4 V
Battery Operating Time (h)	200
Operation Temperature (C°)	-10~+60
Outline size (mm) / weight	175*90*44.5 (231g)
Dimensions	210X115X55
Weight	450g

FIBER OPTIC TEST EQUIPMENT

Fiber Optic Ranger

Fiber Optic Ranger
FO-TF4000

Fiber Optic Ranger

FO-TF4000 Fiber Optic Ranger is a test equipment that works as an optical time-domain reflectometer. It is used in single mode fiber test applications. Fiber optic ranger has a much smaller size and

lighter weight than fiber optic OTDR and is more economical in cost. They are used in troubleshooting, maintenance and testing of optical fiber connections.

Features

- It is portable, durable, lightweight and easy to use.
- Provides more accurate test results and better repeatability.
- A maximum of 8 fiber errors can be detected in each measurement.
- Automatic Pulse Width Control design provides easy-to-use operation.
- It is possible to easily determine the location of errors.
- There is a built-in visual fault finder (VFL) to find errors in dead zones.
- It is designed to be dust, water and shock resistant and is suitable for field use.
- It has a long battery life and 5000 measurements can be made.

Scope of Application

- Testing the distance of fiber and identifying fault location in fiber connection.
- It enables the detection of reflective and non-reflective breaks in the fiber network.
- Examination of fiber repair and maintenance.

Technical Specifications

Operating Wavelength	1550nm (1310nm Optional)
Fiber Type	9/125um SM Fiber
Optical Connector Type	FC/PC
Detector Type	InGaAs
Peak Power of laser	≥60mW
Max. Displaying Distance	Reflection Event: 60km (≥1dB)
Reflection Event Dead Zone	15m
Distance Accuracy Reflection Event	±(2m+2*10 (-4) *Distance)
Wavelength of VFL Option	650nm
Output Power of VFL Option	>=1mW
Power Supply	Alkaline Battery (3pcs AA 4.5V Batteries)
Battery Operating Time	≥5000 measurements
Battery Operating Time (C°)	-5~40
Storage Temperature (C°)	-10~60
Humidity	0~85% (Non-condensation)
Dimensions	190*100*50mm
Weight (g)	450

FIBER OPTIC TEST EQUIPMENT

Fiber Optic Variable Attenuator

Fiber Optic Variable Attenuator
FO-TF8000

Fiber Optic Variable Attenuator

FO-TF8000 handheld optical variable attenuator is used for continuous optical signal attenuation. The attenuator is used in laser systems for online testing. The JW3303 attenuator can be used in

digital communication devices such as PHD and SDH and in systems using analog modulation such as CATV. This attenuator allows precise control of optical signal strength, making it convenient.

Features

- Step by step attenuation with rotating dial: Attenuates in 0.05dB steps.
- It has the ability to display dB and dBm attenuation value.
- The 10-minute auto shut-off feature can be enabled and disabled by turning on/off with the keyboard.
- After the device is turned off, it keeps the attenuation value and step in memory so that it can be used to return the device to the previous power-off state at the next power-up.
- It is portable, durable, lightweight and easy to use.

Scope of Application

- Telecommunications Maintenance
- CATV Maintenance
- Comprehensive cable construction system
- Optical devices research and development
- Optical communication training and laboratory tests
- Other optical projects

Technical Specifications

Attenuating wavelength Range	1260nm~1650nm
Fiber Model	9/125um SM
Optical Connector	FC/PC
Calibrated wavelengths	1310/1490/1550/1625nm
Measurement Range	25~65dB
Resolution	0.05dB
Minimize Insertion Loss	<2.5dB
Linearity	±0.5dB
Repeating	±0.2dB
Attenuating Accuracy	±0.8dB
Return Loss at Input/ Output	>35dB (typical value40dB)
Max input	+20dBm
Rechargeable batteries	7.4V
Power supply adaptor	7~8.5V
Operation temperature (C°)	0~40
Dimensions	210X115X55
Weight	450g

FIBER OPTIC TEST EQUIPMENT

Visual Fault Indicator (VFL)

Visual Fault Indicator (VFL)
FO-TF105

Visual Fault Indicator (VFL)

TF105 VFL is a basic fiber testing tool that is efficient and cost-effective. It provides a visible way to find fiber errors in an optical network and identify fibers during and after installation. It includes:

- Finding breakpoints, poor connections, kinks or cracks in fiber optic cables.
- Finding errors in the OTDR dead zone.
- End-to-end visual fiber identification.

Features

- Constant and stable output power
- The special laser driver circuit design ensures that the laser output power remains at a constant power level as long as the current battery voltage.
- Low battery alert reminds users to replace the battery in time.
- Long battery life (up to 40 hours with AAA batteries)
- Works in CW or Pulsed mode
- Pocket size and lightweight, easy to use

Technical Specifications

Central Wavelength	650nm±10nm
Emitter Type	FP-LD
Output Power	1mw or 10mw
Optical Connector	FC/2.5mm universal connector For 1.25mm connectors, FC (Male)-LC (Female) converter can be optional on customer requests
Operating Model	Both CW and Pulse(2Hz) available
Power Supply	Two AAA alkaline batteries
Battery Operating Time	40hours, Test with Panasonic LR6 AAA ALKALINE battery
Operating Temperature (C°)	-10~+60
Storage Temperature (C°)	-25~+70
Dimension (mm)	100*30*18
Weight	60g

MEDIA & VIDEO CONVERTERS 10/100M Dual Fiber Media Converters

FEATURES

- Compatible with 802.3u 10/100 Base-TX and 100 Base-FX Standards.
- Plug and Play feature.
- Auto-detection half/full duplex transfer mode for TX port.
- Easy view LED's provide to check network activity.
- 1 RJ-45, 1 Duplex SC connector interface.
- External 5V DC power adapter.
- 2 year warranty.

Overview

10/100M Dual Fiber Media Converters comply with IEEE802.3 standards. Media converters support converting data signals between 10/100 Base-TX and 100 Base-FX.

They are connected between fiber optic cables and copper cables in the network. Media converters are transparently compatible with all protocols and can be used for many applications. (For example, Fiber to the Home, Fiber to the Building, Fiber to the Curb, Local Area Network and IP CCTV)

Overview

10/100M Single Fiber (WDM) Media Converters comply with IEEE802.3 standards. Single Fiber media converters provide data transmission over a single fiber optic core with WDM technology.

According to this technology, media converters use different wavelengths for Tx and Rx. Media converters support converting data signals between 10/100 Base-TX and 100 Base-FX.

In the network, connection is made between fiber optic cables and copper cables. Media converters are transparent to all protocols and can be used for many applications. (Such as Fiber to the House, Indoor Fiber, Curb Fiber, Local Network and IP CCTV).

10/100M Smart Fiber Media Converters

MEDIA & VIDEO CONVERTERS

10/100M Smart Fiber Media Converters

FEATURES

- 10/100 Mbps adaptive for ease of network upgrade;
- Supports transparent transmission of extra long packets over VLAN.
- Efficient built-in switching core to implement flow control and reduce broadcast packets;
- Supporting full-duplex and half-duplex transmission modes and capable of auto-negotiation;
- Supporting automatic switching of twisted pair ports for ease of system debugging and installation;
- Support Link Failure Alert (LFA);
- Supports FX half duplex/full duplex transmission modes and link error warning function;
- Supports (unique) switch selection of 10/100Mbps storage and transmission mode and 100Mbps direct transmission mode;
- Support low latency transmission;
- Supporting the transfer of extra long packets (maximum length of 1600 bytes);
- Supporting the transmission of extra long packets over VLAN;
- Extremely low power consumption (less than 2W), low heat and stable working capacity for a long time;
- It supports multiple fiber port types such as dual-fiber multimode, dual-fiber single-mode and single-fiber single-mode to meet users' expanded requirements.

Applications

- Fast Ethernet long distance transmission network at 10/100 Mbps.

Overview

F0-IFE830A is an intelligent 10/100M adaptive fast Ethernet fiber media converter (also called optical-electric media converter). Featuring unique "connection error warning" function on optical and electrical ends, this fast Ethernet fiber converter can completely replace Network Management System (NMS) type fiber converter and greatly reduce system cost.

The F0-IFE830A can interconvert between 10Base-T/100Base-TX copper wire electrical signals and 100Base-FX optical signals.

F0-IFE830A extends the transmission distance of a network from 100 meters to 120 km on copper wires and uses two network transmission technologies to realize data transmission between optical and electrical network connection media (i.e. data link layer 2 storage and transmission mode and physical layer 1 pass-through mode). F0-IFE830A fiber converter supports transmission on dual fiber multimode, dual fiber single mode and single fiber single mode fibers.

Technical Specifications

PARAMETERS	SPECIFICATIONS
Access mode	10/100Mbps
Standard	IEEE802.3 10Base-T Ethernet, IEEE802.3u, 100Base-TX/FX Fast Ethernet, IEEE802.3x Flow control
Wavelength	850nm/1310nm/1550nm
Transmission distance	Dual-fiber multi-mode: 2Km; dual-fiber single-mode: 25/40/60/80/100/120Kms; single-fiber single-mode: 25/40/60/80/100Kms
Port	One RJ45 port: Connected to STP/UTP category-5 twisted pairs / One fiber port: Multi-mode – SC or ST (fiber size: 50,62.5/125µm) / Single mode – SC/FC fiber port (fiber size: 9/125µm) / Single-fiber single-mode – SC/FC fiber port (fiber size: 9/125 µm)
Conversion mode	Medium conversion, storing and forwarding/straight-through
MAC address table	1K
Buffer space	1Mbit
Flow control	Full duplex state: flow control; half-duplex state: back pressure mode
Delay	Storing & forwarding: 9.6 µs; straight-through: 0.9 µs;
Bit error rate	<1/1000000000
MTBF	100,000 hours
LED	POWER (power), FX LINK/ACT (fiber link/action) / FDX (FX full-duplex mode), TP LINK/ACT (twisted pair link/action) / TP 100 (twisted pair: transmission rate of 100M); FX 100 (fiber: transmission rate of 100M) (external power)
Power	DC5V 1A (external), AC220 0.5A/DC-48 (built-in)
Power consumption	<2W
Operating temperature	-10~55°C
Operating humidity	5%~90%
Storage temperature	-40~70°C
Storage humidity	5%~90% (non-condensing)
Dimensions	26mm(H)*71mm(W)*95mm(D) (height * width * depth) (external power) / 26mm(H)*85mm(W)*135mm(D) (height * width * depth) (built-in power) / 110mm(H)*22mm(W)*81mm(D) / (height * width * depth) (module card)

MEDIA & VIDEO CONVERTERS

4 Ports 10/100/1000m + 2 Port SFP Fiber Media Converter

FEATURES

- IEEE802.3 10 Base-T standard,
- IEEE 802.3u
- Compatible with 100Base-TX/FX standard and IEEE 802.3z/ab 1000Base-TX/FX standard.
- Plug and Play feature.
- Auto-sensing half/full duplex transfer mode for TX port.
- Easy-view LEDs allow checking network activity.
- External 5V DC power adapter.
- 2 years warranty.

Overview

4 Port 10/100/1000M + 2 Port SFP Fiber Media Converters are designed to comply with IEEE802.3, IEEE802.3u, IEEE802.3z and IEEE802.3ab standards. Media converters support converting data signals between 10/100/1000 Base-TX and 1000 Base-SX/LX.

These media converters act as a bridge between fiber optic cables and straight pair copper cables and are used in networking.

Media converters transparently support all protocols and include Fiber to the Home, Fiber to the Building, Fiber to the Curb, Local Area Network and IP CCTV. It can be used in many applications such as (Closed Circuit Television).

Product Code	Product Description
FO-OPT-065	4 Port 10/100/1000M + 2 Port SFP Module External Fiber Media Converters

MEDIA & VIDEO CONVERTERS

8 Port 10/100m + 1 Port 100m Fiber Media Converters

MEDIA & VIDEO CONVERTERS

8 Port 10/100m + 1 Port 100m Fiber Media Converters

FEATURES

- Adaptive 10Mbps and 100Mbps environments for ease of network upgrades;
- Supports transparent transmission of extra long packets over VLAN.
- Efficient built-in switching core to implement flow control and reduce broadcast packets;
- Provides eight independent 10/100Mbps adaptive switching type twisted pair ports to implement electrical interface redundancy and multi-user access;
- Provide eight electrical interfaces based on VLAN switch setting and support the connection of users from different units;
- Supporting full-duplex and half-duplex transmission modes and capable of auto-negotiation;
- Supporting automatic switching of twisted pair ports for ease of system debugging and installation;
- Supporting the transfer of extra long packets (maximum length of 1552 bytes);
- Low power consumption, low heat and stable working capacity for a long time;
- It expands users' requirements by supporting multiple types of fiber ports, such as dual-fiber multimode, dual-fiber single-mode and single-fiber single-mode;

Applications

- Fast Ethernet long distance transmission network at 10/100 Mbps.

Overview

FO-FC650A is a type of 10/100Mbps adaptive fast Ethernet fiber media converter (also called optical-electric media converter). It comes with a built-in eight-port 10M/100Mbps adaptive switch and can achieve mutual conversion between four independent 10Base-T/100Base-TX straight-pair electrical signals and 100Base-FX optical signals.

FO-FC650A can extend the transmission distance of a network from 100m (in single-mode full-duplex mode) to 120Km over copper wires. It supports two different types of network connection media: 10/100Base-TX and 100Base-FX.

With the application of switching technology and store and forward technology, FO-FC650A can realize data transmission between two types of network connection media. This type of converter supports transmission on dual fiber multimode, dual fiber single mode and single fiber single mode fibers.

Technical Specifications

PARAMETERS	SPECIFICATIONS
Access mode	10/100Mbps
Standard	IEEE802.3 10Base-T Ethernet, IEEE802.3u, 100Base-TX/FX Fast Ethernet, IEEE802.3x Flow control
Wavelength	850nm/1310nm/1550nm
Transmission distance	Dual-fiber multi-mode: 2Km; / Dual-fiber single-mode: 25/40/60/80/100/120Km; / Single-fiber single-mode: 25/40/60/80/100Km Category-5 twisted pair: 100m
Port	Eight RJ45 interfaces: connected to STP/UTP category-5 twisted pair / One fiber port: Multi-mode - SC or ST (fiber size: 50,62.5/125µm) Single mode - SC/FC fiber port (fiber size: 9/125µm) / Single-fiber single-mode - SC/FC fiber port (fiber size: 9/125µm)
Conversion mode	Medium conversion, storing and forwarding mode
MAC address table	1 K
Buffer space	1Mbit
Flow control	Full duplex state: flow control; half duplex state: back pressure mode
Delay	9.6us
Bit error rate	<1/1000000000
MTBF	100,000 hours
LED	POWER (power), FX LINK/ACT (fiber connection/action) / FDX (FX full duplex mode), FX100 (Fiber, with a transmission rate of 100M) TP1/2/3/4/5/6/7/8 LINK/ACT (1/2/3/4/5/6/7/8-port twisted pairs connection action) TP1/2/3/4/5/6/7/8 100 (1/2/3/4/5/6/7/8-port twisted pairs, with a transmission rate of 100M)
Power	DC5V/1A (external)
Power consumption	5W
Operating temperature	-10~55°C
Operating humidity	5%~90%
Storage temperature	-40~70°C
Storage humidity	5%~90% (non-condensing)
Dimensions	38mm(Height)*118mm(Width)*152mm(Depth) (external power)

Product Code	Product Description
FO-FC650AM-2SC/ST	8 Port 10/100M + 1 Port 100M Fiber Media Converters (Dual-Fiber Multi Mode, 1310, 2, External)
FO-FC650AS-2560-SC/ST	8 Port 10/100M + 1 Port 100M Fiber Media Converters (Dual-Fiber Single Mode, 1310, 25/40/60, External)
FO-FC650AS-80120-SC/FC	8 Port 10/100M + 1 Port 100M Fiber Media Converters (Dual-Fiber Single Mode, 1310, 80/100/120, External)
FO-FC650ASS-2560-SC	8 Port 10/100M + 1 Port 100M Fiber Media Converters (Single-Fiber Single Mode, 1310/1550, 25/40/60, External)
FO-FC650ASS-80100-SC	8 Port 10/100M + 1 Port 100M Fiber Media Converters (Single-Fiber Single Mode, 1310/1550, 80/100/120, External)

MEDIA & VIDEO CONVERTERS Single Mode/Multimode Converters

MEDIA & VIDEO CONVERTERS Single Mode/Multimode Converters

FEATURES

- Plug and Play feature.
- Support full-duplex and half-duplex networking with auto-negotiation feature.
- Support transmission of extra long packets over VLAN.
- Support Quality of Service (QoS) and ensure the transmission of VoIP packets.
- Support Spanning Tree Protocol (STP) to create a redundant network.
- Easy-view LEDs allow checking network activity.
- External 5V DC power adapter.
- 2 years warranty

Overview

Single Mode/Multimode Fiber optic media converters are applied to data networks with mixed cable connections of single mode and multimode fibers.

Single Mode/Multimode converters can realize mutual conversion between single mode and multimode 1310nm wavelength, and also can achieve mutual conversion between 850nm, 1310nm and 1550nm wavelengths.

It can also realize the signal combining function, further extending the transmission distance in multi-mode fiber. This kind of converter supports dual fiber multimode and dual fiber single mode transmission.

Technical Specifications

MODELS	OPT-050	OPT-051
Access mode	10/100 Mbps	10/100/1000 Mbps
Standard	IEEE802.3 (10 Base-T Ethernet), IEEE802.3u (100 Base-Tx/Fx Fast Ethernet), IEEE802.3x (Flow Control)	IEEE802.3 (10 Base-T Ethernet), IEEE802.3u (100 Base-Tx/Fx Fast Ethernet), IEEE802.3ab (1000 Base-Tx), IEEE802.3z (1000 Base-SX/LX Gigabit Ethernet), IEEE802.3x (Flow Control)
Wavelength	850nm / 1310nm	
Transmission distance	2 km (MM) / 25 km (SM)	0,5 km (MM) / 20 km (SM)
BER	< 10 ⁻⁹	
MTBF	> 100.000 hours	
Power Supply	5V DC / 1A external power supply	5V DC / 2A external power supply
Power Consumption	< 3.5W	
Operating Temperature	0 / +50°C	
Operating Humidity	5 – 90 % (non-condensing)	
Storage Temperature	-40 / +70°C	
Dimensions	95 x 70 x 26mm (external power)

CLEANING ELEMENTS

FIBER OPTIC CLEANING MATERIALS FO Connectors Maintenance and Cleaning Tools

FIBER OPTIC CLEANING MATERIALS FO Connectors Maintenance and Cleaning Tools

ONE-CLICK CLEANER FOR 2.5MM THIMBERS

- Cleans 2.5mm ferrules (SC, ST, FC and E2000)
- Simple push motion for driving
- Audible CLICK sound to alert the operator when the vehicle is fully used
- Provides over 525 uses per unit
- Dry cleaning thread eliminates the need for solvents to be effective
- Crush resistant over 250N
- Withstands drops from more than 1.5 meters

Care and Cleaning Products

A properly functioning fiber optic network requires clinical cleaning of all fiber optic connections. A dust particle or fingerprint can dissipate enough optical power from the core and disable the entire connection. When not in use, all fiber connector ends should be covered with dust caps to prevent scratches and dents from forming on the connector ends. Dents and scratches on the surface of one connector can migrate when mated to another connector, ultimately propagating damage and requiring re-termination of both fibers.

Fiber Optic Connector Cleaner

- Cleans all standard 2.5mm and 1.25mm connectors (including SC, FC, ST, MU, LC)
- Specially formulated antistatic microfiber cloth
- Portable size, suitable for handheld use
- Best cleaning effect at once
- Saves cleaning time
- Dry special antistatic microfiber fabric that does not contain residue and fiber
- Easily replaceable reel
- Dust/oil/particle/alcohol etc. for cleaning

One Click Cleaner 1.25mm

- Cleans 1.25mm ferrules (LC, MU)
- Simple push motion for driving
- Audible CLICK sound to alert the operator when the vehicle is fully used
- Provides over 525 uses per unit
- Dry cleaning thread eliminates the need for solvents to be effective
- Crush resistant over 250N
- Resistant to drops greater than 1.5M

2.5mm Fiber Rod

Fiber Sticks are ideal consumables for cleaning bulkheads after installation. These are used to clean the end faces of connectors inserted through the container. The tight fit of the foam cap also ensures that any contaminants inside the adapter are removed.

1.25mm Fiber Rod

Fiber sticks are ideal consumables for cleaning 1.25mm bulkheads after installation. These can be used to clean the end faces of connectors inserted through the container. Cleaning is accomplished by inserting the fiber tip into the opening of the adapter and turning it once. The fiber stick material allows the user to clean the installed connector ends without scratching the surface and provides excellent cleaning.

Cleaning Wipes

- For Professional and Industrial use only.
- Open the package and clean the surface with a pre-saturated cleaning cloth.
- Do not reuse, safe for plastics.
- It evaporates quickly.
- Leaves zero residue.
- It is not corrosive.
- It is made of lint-free fabric.

FIBER OPTIC CLEANING MATERIALS

FO Connectors Maintenance and Cleaning Tools

Alcohol

- Lock-in pump does not leak when in use - suitable for travel
- Made from high density polyethylene material suitable for many solvents
- Square shape provides stability and saves storage space
- Large opening that can be easily filled
- Transparent - contents are easily visible
- Dispenses approximately 2 cc of fluid with each pump
- Filled with alcohol and ready for immediate use

KIMWIPES

- Absorbent and contains little lint
- 280 cleaning cloths per box
- Gentle on delicate surfaces
- Controlled single sheet distribution
- Low extractable substance content

QbE

- Full Fiber Optic Cleaning System
- The platen side of the box provides surface for cleaning
- Effective "Wet" or "Dry" cleaning
- Offers an excellent Cleaning System for field or OEM applications
- Convenient Size - Portable system fits easily into tool bags and is practical for use on workbenches.

Grounding Kit & Feed Clamp

Grounding Kit

Grounding Kit

Technical Specifications

- Brand: ACONN
- It is used as grounding protector of feeder cables.
- We produce clip-on grounding kit, standard grounding kit, frame grounding kit.
- 1/4", 1/2", 3/8", 1-1/4", 1-5/8", RGB cable etc. Suitable for.
- 16mm² or 25mm² cable according to customer demand.
- Cable length (0.6m, 0.8m, 1m) upon customers' request
- Easy installation with good performance.
- RoHS compliant

Feed Clamp

Feed Clamp

Technical Specifications

- Brand: ACONN
- Applicable for fixing feeders for microwave and mobile systems.
- Suitable for 1/2", 3/8", 7/8", 1-1/4", 1-5/8", LMR400, LMR600, RG214 cables.
- It should be made of high quality SUS304 and PP.
- Salt spray test: 48 HOURS, No rust
- Temperature Range: -40 °C to +75 °C
- Easy installation with good performance.
- RoHS compliant
