

FIBER OPTIC ADAPTERS

BARE ADAPTERS

Low
Ins.
loss

High
quality

Bare fiber adapter allows users to make fast connection of the bare fiber and the fiber optic equipment, bare fiber adaptors can be used in some emergency situation for urgent connection.

On one side of the bare fiber adapter is optical fiber and on the other side is the optical connector used to connect equipment. they are widely used to quickly and easily terminate the fiber to the equipment.

FEATURES

- » Fits accordingly FC, ST, SC adapters
- » Lightest weight and very compact size
- » Specially designed mechanism minimizes insertion loss
- » Easy to operate
- » User friendly — easy to insert, remove and reload fiber

APPLICATION

- » For fast and temporary fiber optic connections in communication system
- » Temporarily connectorizes bare fiber
- » Production line of fiber optic devices
